Comment Reasons:

Comment: Hi, I appreciate the fence is needed for safeguarding issues but I just wish to object to the line of the fence alongside the path next to the river Mersey at the gateway & gates. It has already been washed away in a flood and this type of fencing also holds any debris that is washed up against it so having a gateway that sticks out into the river path is not ideal either for the fence as it creates a river debris collection point or path users as it creates a pinch point & should the river wash the bank & path away it would effectively cut off the well used path. I suggest that the fence continue in a straight line to create a right-angled corner where it meets the TPT, which not only helps all the path users from/to Manchester Road, but should reduce costs for the school as it involves less fencing & gates. I would have added a drawing but your system doesn't seem to allow it.
