

Quality

All our ranges are fully tested to assure the user of its fire resistance and technical properties, such as water absorption, tensile strength, impact strength, flexural strength, density and slip resistance.

We have Product Specifications available, with specific design guidance to further assist with your decision making. Request via your merchant.

Specification

The component make-up of our Piranha products is:

- 60% FSC® 100% Hardwood timber which is processed into a wood powder for blending into a refined mix for better extrusion. This is heated and dried until it is free of moisture.
- 30% Recycled HDPE plastic. This is cleaned from any contamination, screened for any impurities and then granulated into pellets.
- 10% Additives. These include stabilizers, waxes, lubricants, stiffening agents, impact modifiers, blowing agents, fire retardants and colour.

Responsible Sourcing

Talasey are FSC® certified and by choosing Piranha you are helping to take care of the world's forests. Talasey are passionate and proud to maintain their certification.

The Forest Stewardship Council® are the world's most trusted sustainable forest management solution.

As the original pioneers of forest certification, set up in 1992, they have many years of experience in sustainable forest management. They use their expertise to promote the responsible management of the world's forests, bringing together experts from the environmental, economic and social spheres.

The FSC® mission is to promote environmentally appropriate, socially beneficial, and economically viable management of the world's forests.

The true value of forests is recognized and fully incorporated into society worldwide. FSC® is the leading catalyst and defining force for improved forest management and market transformation, shifting the global forest trend toward sustainable use, conservation, restoration, and respect for all.
