Date: 27.02.2026

Project details:

Painted wall mural on 4 sides of the lift shaft at Queens Rd Metrolink station for both Metrolink and the transport museum.

Preparation:

The wall preparation (cleaning and undercoat) to be taken out by Metrolink and any repairs to the surface that may need to be undertaken.

Secure scaffolding and any barriers to be provided by Metrolink.

Any masking of non painted areas to be taken care of by myself

Design and layout of the mural

The mural has been designed in conjunction with the transport museum and Metrolink with several visual mock ups to show how the mural will look on the wall for approval.

Materials and equipment

The mural will be painted with a mixture of outdoor mural grade acrylic paint (applied with rollers and brushes) for the background colours. The larger detail will be painted with acrylic based industry standard aerosol spray paint and the finer details will be with an airbrush with the same paint.

Scaling and painting of the mural

For the murals initial sketch up I will use a mixture of square grid scaling and also VR headset to accuracy. Andy logos will be stencilled on.

Health and Safety measures

Surrounding areas will be masked and protected by myself. materials will be properly stored and protected whilst working. Safety barriers to keep the public a safe distance from the scaffold and any paint fumes. netting to be supplied by Metrolink for the scaffold to help prevent any falling items. Please see risk assessment pdf.

Mural protection and longevity

An anti-graffiti coating like chelaguard will be applied, this is to be supplied by Metrolink.

Time frame for completion

Weather dependent the estimated time frame for the mural completion will be 14-20 days
