

Doc Name: Chimney 26 Change to Allow for Sequencing of Scaffold Decant

Doc Reference: OTH-PUR-TH-RF-SKE-A-3475

Status: For Review and Comment

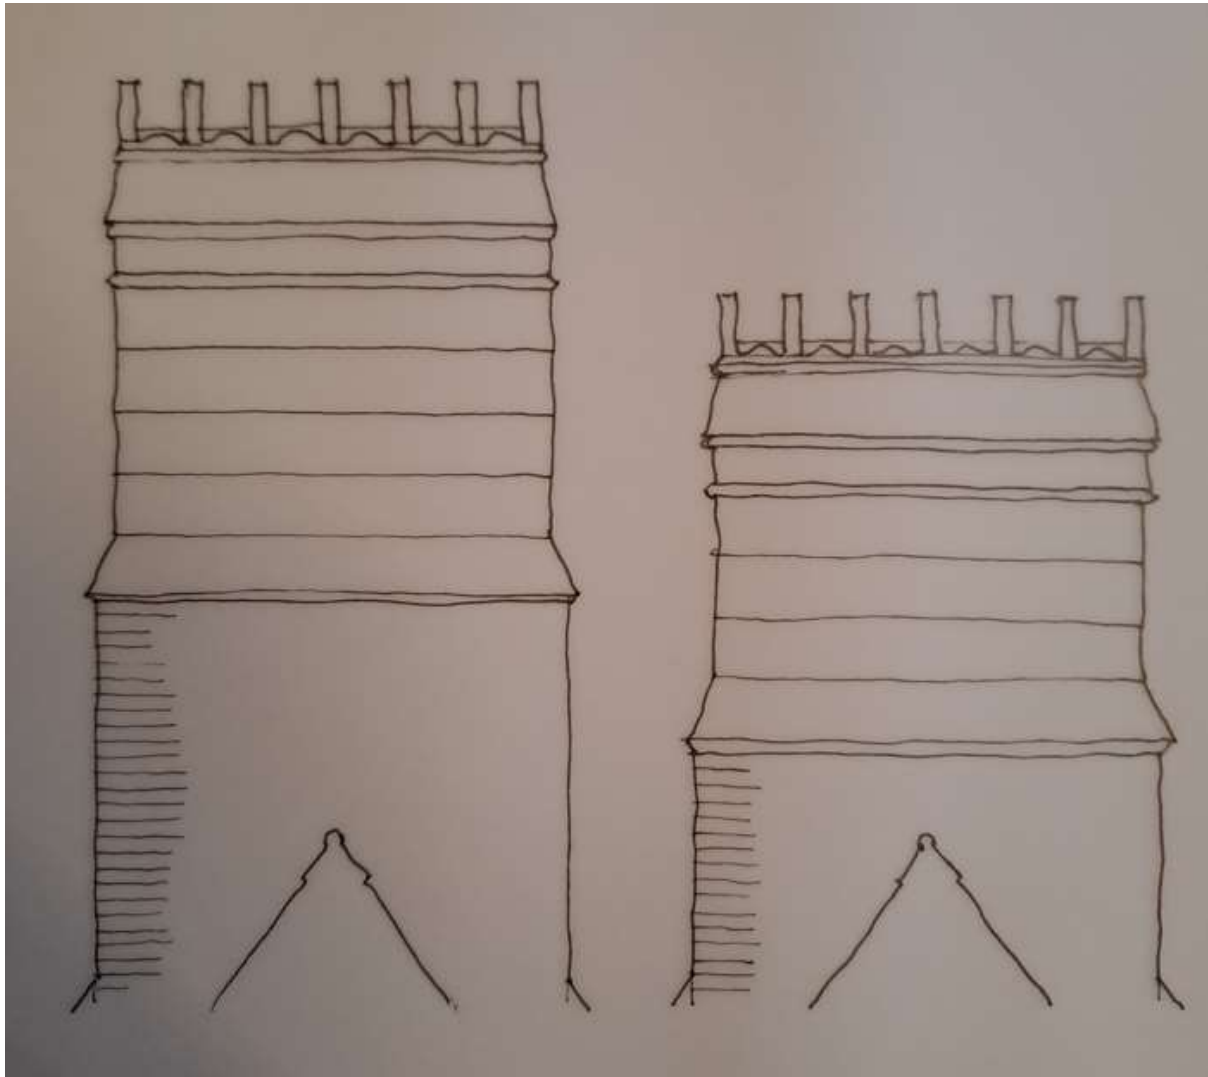

Document Type: Sketch

Purpose:	<i>The proposed sequencing of decanting the scaffold for the Great Hall has an inappropriate risk of damage to the Bees Landing rooflight.</i> <i>Alternative sequences have been reviewed. Balancing the procurement, programme and heritage aspects of the project, the preferred solution is to lower the height of the restored chimney (Chimney 26). This allows for localised retention of the scaffolding in its current location whilst the chimney works are carried out.</i> <i>Alteration proposes to lower the height by 10nr courses of brick and 1nr course of ashlar</i>
Location:	Chimney 26
Documents affected:	Chimney details
WP's affected:	Stonework (chimney)
Purcell	Na
Ramboll	Yes
Arup	Na
Planit	Na
