There are some exemptions. View government planning guidance on fire statements or access the fire statement template and guidance.

Description

Please describe details of the proposed development or works including any change of use

Proposed installation of discreet opening window panes within the existing arched window frames to provide natural ventilation and ensure ongoing maintenance access. The new opening sections will be designed to match the existing glazing pattern and frame profiles in material, colour, and finish, ensuring no visual impact on the historic façade.

In addition, installation of a low-profile kitchen extraction vent is proposed, positioned to align with existing vents on the same elevation to maintain visual consistency. The proposed vent will be finished to blend with the surrounding brickwork and will replicate the style and scale of other approved vents on the building.

No alterations are proposed to the overall window or façade structure, and opening window panes are fully reversible to preserve the character and integrity of the building within a conservation area.

Your local planning authority will be able to advise on the content of any assessments that may be required.

Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 (as amended)) would apply?

◯ Yes
⊘ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in The Environment Act 2021: "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

Reason biodiversity net gain does not apply:
Self-build and custom build development

Are you building more than nine houses?:
No

Is the total size over 0.5 hectares?:
No

Do all buildings meet the definition of self-build or custom housebuilding as set out in section 1(A1) of the Self-build and Custom Housebuilding Act 2015?:
Yes

Does your Local Planning Authority require applicants for self-build and custom-build development to evidence their eligibility?:
No

Please justify the reason why biodiversity net gain does not apply:
This is only for window opening and vent on an already built unit. No major changes being requested.

Note: Please read the help text for further information why developments may be exempt or not in scope.

Details of the pre-application advice received

1) A fully completed application form and certificate. You have completed a form for listed building consent but instead need to complete an application form for full planning permission. You should also sign Certificate B instead of Certicate A due to the other tenants in the building and the owner of the building and land.
2) Scaled existing and proposed elevation drawings of the elevation affected by the works. The proposed drawings should be clearly annotated to show the proposed works.
3) Large scale elevations of the alterations in context with the surrounding fabric.
4) Scaled existing and proposed cross sections with the alterations shown in context with the surrounding fabric. The proposed drawings should be clearly annotated to show the proposed works.
5) A heritage statement including a full justification for the works in line with Government guidance given in Section 16 of the National Planning Policy Framework, including reference to specific paragraphs. You should assess the existing historical, technical and architectural significance of the building and explain how the proposal may impact on the architectural and historical character and appearance of the building. You also need to clearly state how any original building fabric will be altered, removed or concealed as part of the proposal. This Statement is required to enable all consultees to make an informed response. This would need to assess the impact on the surrounding Conservation Area and any nearby listed buildings. It will need to fully comply with the advice but should be proportionate to the level of work and would not need to be lengthy. You should include annotated photos.
I am therefore holding your application and if you wish to discuss the information required members of my staff will be pleased to assist.
Please return any documents/information required to the Information, Delivery & Support Team, Planning at the above address.
