Piccadilly Gardens: Hoarding Planning Application
Transport/ Highways Statement – Additional information

The following information is in response to the queries raised around the planning application submitted for hoarding to Piccadilly Gardens.

Vehicular Access and Movement :

- as shown on drawing ref .******* vehicles will enter through the hoarding at the Oldham Street / Piccadilly junction. Vehicles will turn around within the hoarded off area and exit site the same route in forward gear - there will be no reversing out of the hoarded off area.
- management of access into the hoarded off area will be via a banks man who will unlock the gates and open them to allow access in. The banks man will stop pedestrians from crossing the vehicular access whilst vehicles drive in.
- For phase 1 of the works, once the hoarding is installed, it is expected small to medium size flat bed trucks will access the site approximately 1 -2 times per day
- For phase 2 of the works we would take advice from the appointed contractor

Pedestrian Movement / Management :

- the proposed signage is shown on drawing ref. ****** together with minimum footpath widths within Piccadilly Gardens.
- signage will clarify footpath closures and suggest alternative routes, signage will be positioned, as shown, at entry points into Piccadilly Gardens
- the footpaths will be lit from the hoardings which will have LED lights on.

Hoarding Management :

- the hoarding is to be installed by a specialist company who will be responsible for the maintenance and security of the hoardings whilst it is being installed. Details will be provided in due course and before the hoarding installation commences..
- Equans FM Company will be the responsible contractor for Phase 1 of the hoarding and will carry out any reinstatement, replacement or adjustements required either due to damage or at the request of MCC etc - emergency contact details will be provided in due course and before the hoarding installation commences

The information should be read in conjunction with drawing PGD-AHR-XX-ZZ-D-A-9007-Hoarding - Transport strategy-P01.

Yours sincerely

Andrew Wilson
