Canopy Revision - Design Proposal

Day Sketch View

Precedent Images

Evening Sketch View

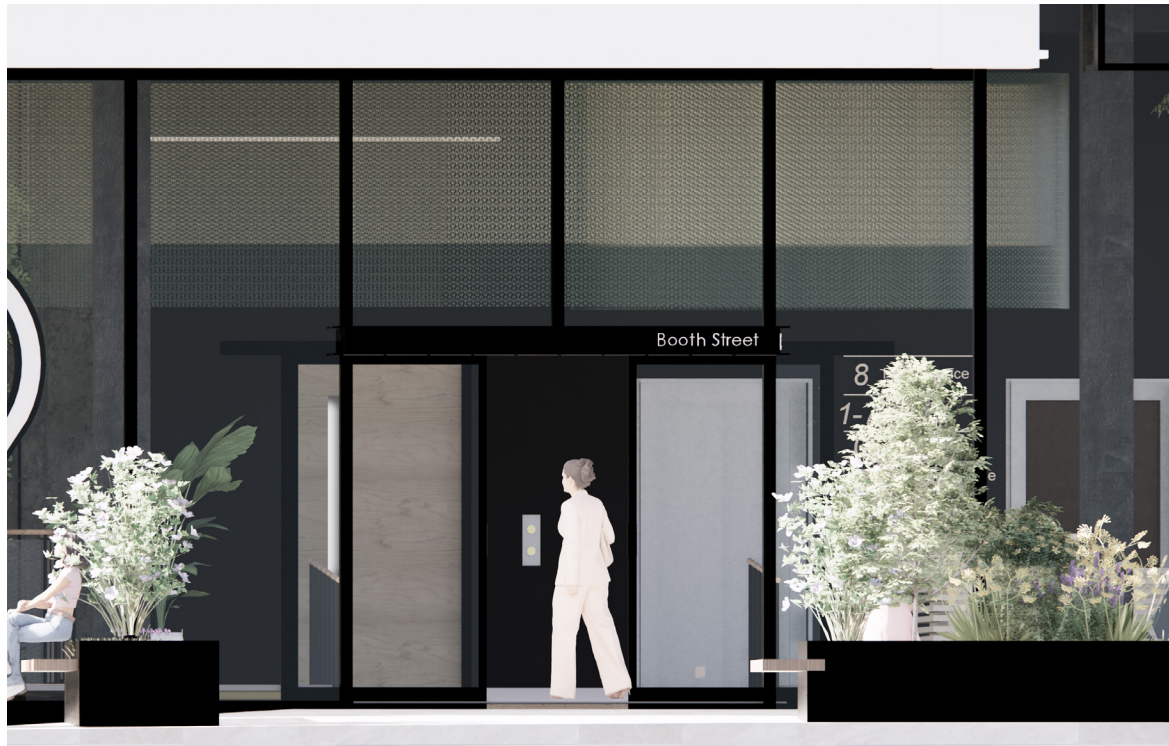

Subtle glow from light during the evening to assist wayfinding in winter / dark days / evenings for operating hours.

Key elements:

- Canopy doesn't protrude further than the existing cantilever.
- Details reflect existing aluminium brise soleil.
- Minimalist look and feel.
- Canopy covers width of the sliding entrance door.
- Provides way-finding and sense of arrival from both Booth Street and Mosley Street.
- Canopy materials to match existing Brise Soleil colour and finish.

Note: Signage shown is indicative.

Canopy Revision - Design Proposal

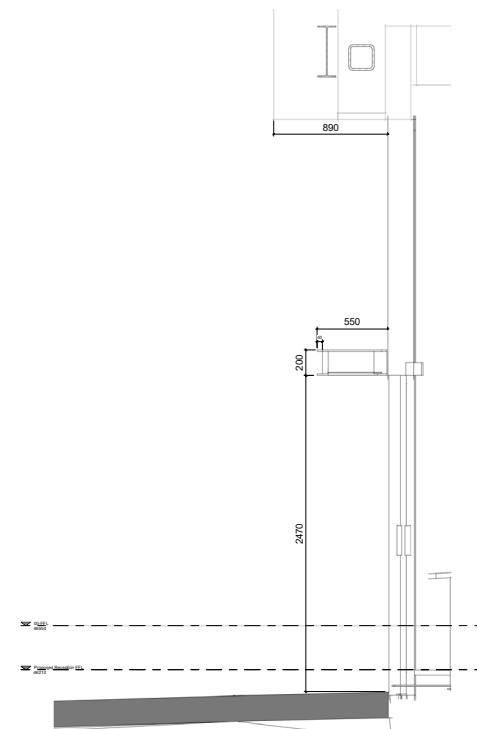

Elevation B - Rendered

Elevation B - Details (NTS)

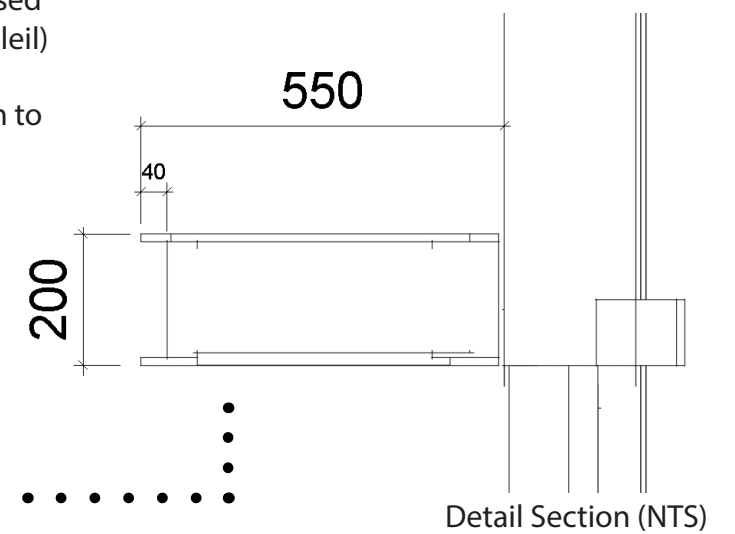

Elevation A - Rendered

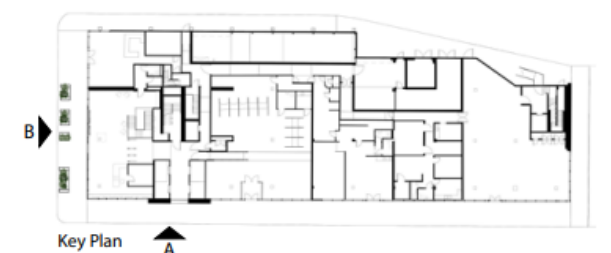

Elevation A - Details (NTS)

Thin sheet metal, anodised black (to match Brise Soleil) above and below, main panel set back by 40mm to create C shape

Detail Section (NTS)

Canopy Revision - Brise Soleil Inspiration Study

Photo of existing Brise Soleil

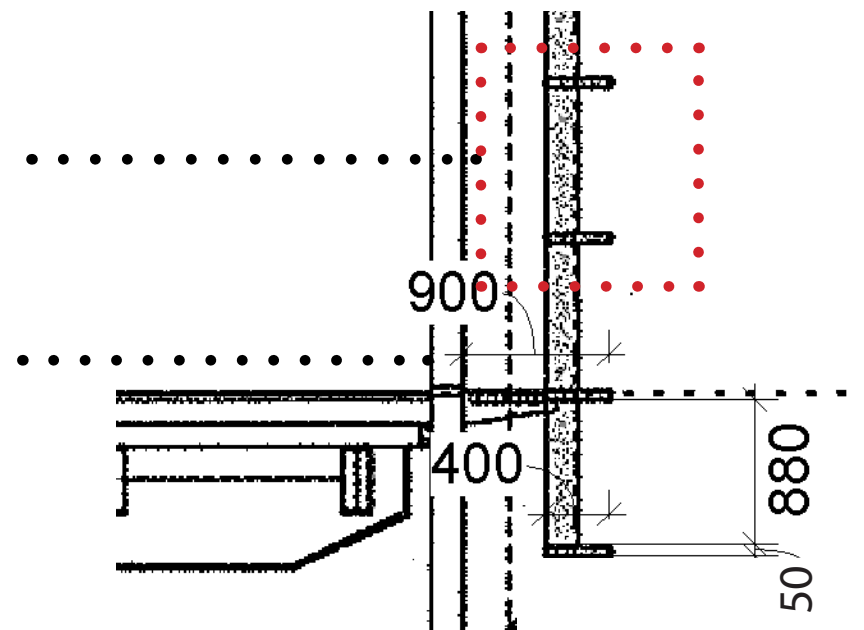

Canopy finish to match existing material and texture

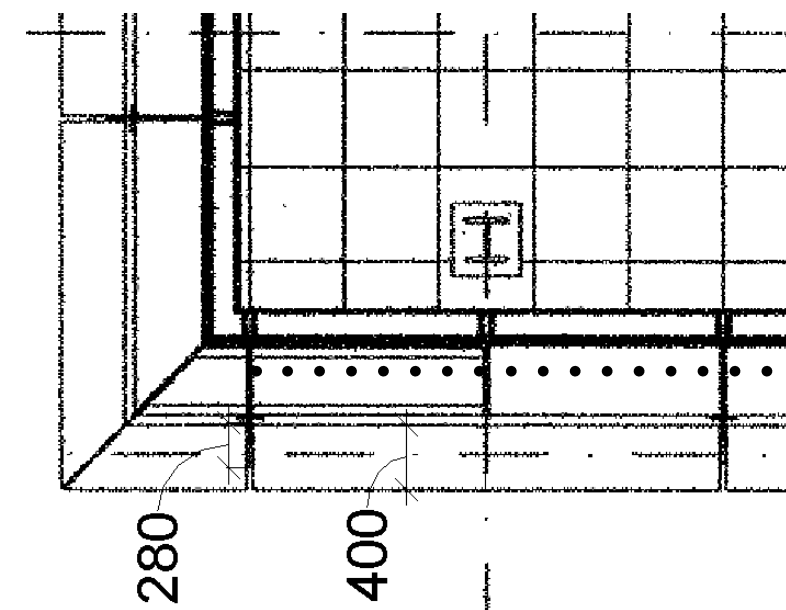

Day Sketch View

Vertical and Horizontal Brise Soleil
Vertical fins set back from horizontal fins creating C shape mimicked in canopy design.

Fins are set approx. 500mm from glazing to office floors.

Existing Section Detail (NTS)

Existing Plan Detail (NTS)

Existing Plan and Section of photographed detail:

*Dimensions estimated from existing drawing information.

*Dimensions to be checked on site.

Canopy dimensions inspired by thin horizontal fins in the Brise Soleil.

Context Review - Booth Street Section

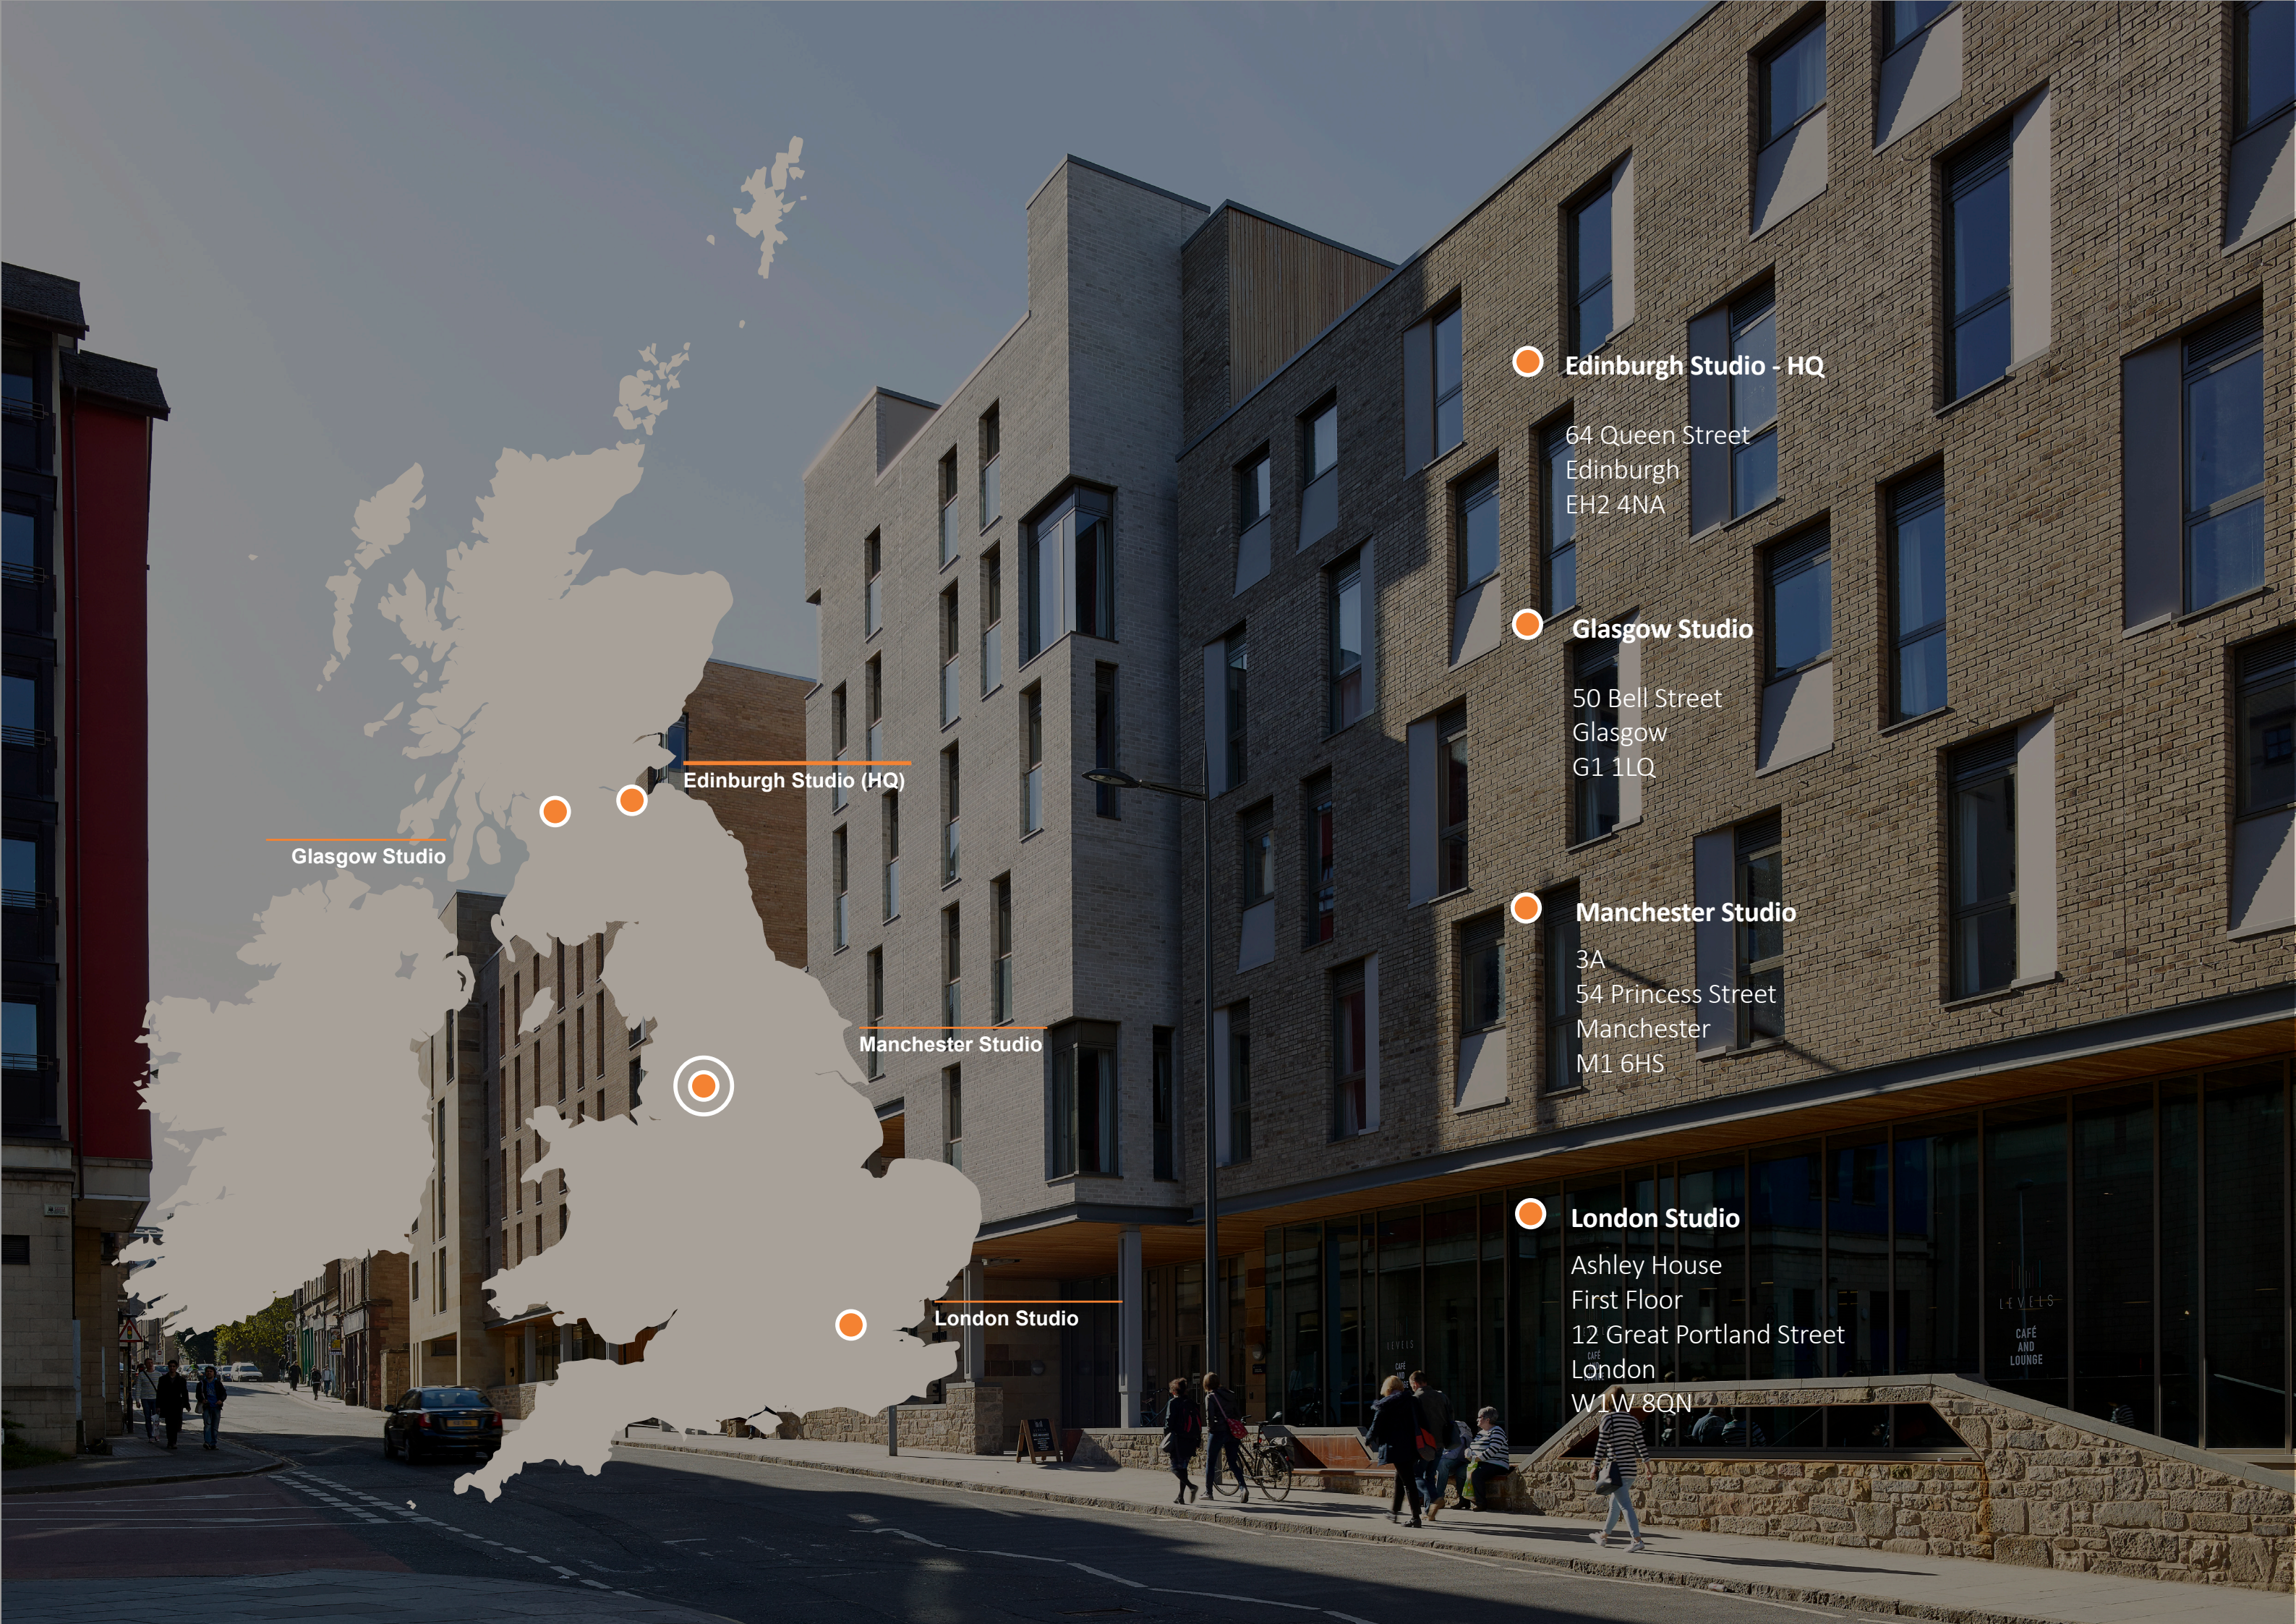

By widening the pavement and relocating the entrance to Booth Street the view atmosphere of number 74 and 58 Mosley Street are enhanced. The canopies on both buildings provide a sense of presence and destination to the entrances to assist with way-finding from Mosley Street to Booth Street.

The defused glow of the light underneath the canopy will provide a sense of safety to the new paved area.

The design for the canopy for 58 Mosley Street is inspired by the architecture of the existing building, an extension of the curtain walling and brise soleil, the thin profile, designed to appear weightless and

unobtrusive, creating an opportunity for subtle signage to the Mosley Street elevation.
