Date: 29 December 2025

Dear Sir/Madam,

Pre-Commencement Conditions
Application number: 143915/FO/2025
Land At 21 - 27 Vale Street, Manchester,

In accordance with s100ZA of the Town & Country Planning Act 1990 (as amended), this letter gives notice of the requirement to place pre-commencement condition(s) on any permission arising from the above application.

The required condition(s), and the reason(s) for them are as follows:

a) Before the development commences a scheme for acoustically insulating the proposed residential accommodation against noise from nearby commercial premises and any other potential noise sources shall be submitted to and approved in writing by the City Council as local planning authority.

The potential for overheating shall also be assessed and the noise insulation scheme shall take this into account. The approved noise insulation and ventilation scheme shall be completed before any of the dwelling units are occupied.

Noise survey data shall include measurements taken during a rush-hour period and night time to determine the appropriate sound insulation measures necessary.

b) Prior to first occupation of the residential units, a verification report shall be required to validate that the work undertaken throughout the development conforms to the recommendations and requirements in the approved acoustic consultant's report. The report shall also undertake post completion testing to confirm that the internal noise criteria have been met. Any instances of non-conformity with the recommendations in the report shall be detailed along with any measures required to ensure compliance with the internal noise criteria.

Reason: To secure a reduction in noise from traffic or other sources in order to protect future residents from noise disturbance and to reduce the potential for overheating, pursuant to saved policy DC26 of the Unitary Development Plan for the City of Manchester and policies SP1 and DM1 of the Manchester Core Strategy.

a) Before the development hereby approved commences, a report (the Preliminary Risk Assessment) to identify and evaluate all potential sources and impacts of any ground

contamination, groundwater contamination and/or ground gas relevant to the site shall be submitted to and approved in writing by the City Council as local planning authority. The Preliminary Risk Assessment shall conform to City Council's current guidance document (Planning Guidance in Relation to Ground Contamination).

In the event of the Preliminary Risk Assessment identifying risks which in the written opinion of the Local Planning Authority require further investigation, the development shall not commence until a scheme for the investigation of the site and the identification of remediation measures (the Site Investigation Proposal) has been submitted to and approved in writing by the City Council as local planning authority.

The measures for investigating the site identified in the Site Investigation Proposal shall be carried out before development commences and a report prepared outlining what measures, if any, are required to remediate the land (the Site Investigation Report and/or Remediation Strategy) which shall be submitted to and approved in writing by the City Council as local planning authority.

b) When the development commences, the development shall be carried out in accordance with the previously agreed Remediation Strategy and prior to occupation a Completion/Verification Report shall be submitted to and approved in writing by the City Council as local planning authority.

In the event that ground contamination, groundwater contamination and/or ground gas, not previously identified, are found to be present on the site at any time before the development is occupied, then development shall cease and/or the development shall not be occupied until, a report outlining what measures, if any, are required to remediate the land (the Revised Remediation Strategy) is submitted to and approved in writing by the City Council as local planning authority and the development shall be carried out prior to occupation in accordance with the Revised Remediation Strategy, which shall take precedence over any Remediation Strategy or earlier Revised Remediation Strategy.

Reason - To ensure that the presence of or the potential for any contaminated land and/or groundwater is detected and appropriate remedial action is taken in the interests of public safety, pursuant to policies DM1 and SP1 of the Manchester Core Strategy.

a) Prior to commencement of the development, a scheme for electric vehicle charging and any other considerations, for example boiler emissions, shall be submitted to and approved in writing by the City Council as local planning authority.

b) Prior to occupation of the development any agreed mitigation measures shall be implemented and verified as such in writing by the City Council as local planning authority and shall remain in situ whilst the use or development is in operation.

Reason: In the interests of the air quality surrounding the development and to secure a reduction in air pollution from traffic or other sources in order to safeguard the amenity of nearby residents from air pollution, pursuant to policies SP1, EN16 and DM1 of the Manchester Core Strategy and Greater Manchester Air Quality action plan 2016.

Prior to the commencement of the development hereby approved, a detailed construction management plan outlining working practices during development shall be submitted to and approved in writing by the local planning authority, which for the avoidance of doubt should include;

- Display of an emergency contact number;
- Hours of working;
- Dust suppression measures;

- Compound locations where relevant;
- Location, removal and recycling of waste;
- Phasing and quantification / classification of vehicular activity associated with planned construction, including commentary on types and frequency of vehicular demands together with evidence (including appropriate swept-path assessment) of satisfactory routing both within the site and on the adjacent highway
- Routing strategy of construction vehicles;
- Parking of construction vehicles and staff; and

Development shall be carried out in accordance with the approved construction management plan.

Reason - To safeguard the amenities of nearby residents and highway safety, pursuant to policies SP1, EN9, EN19 and DM1 of the Manchester Core Strategy.

Please confirm your agreement to the above conditions within 10 working days. If we do not hear from you within this period, we will impose the conditions on any permission. Please note that this information is provided without prejudice to any final decision in relation to this application.

If you would like any further information about this letter, please contact Ian Jarvis using the above details. Please quote the above reference number on any further correspondence.

Yours faithfully,

Julie Roscoe
