Hi sam

Confirm the condensing unit and  acoustic enclosure  are located internally.

Kind regards
David Pattison

Hi David,

Just to clarify – is the louvred plant enclosure sited wholly internally or is it to impact the external elevations? If the plant and enclosure are sited internally in a plant room then we can discharge the condition. However if the louvre is an external louvre this will make things slightly complicated.

Can you confirm if the plant+enclosure would be internal?

Thanks,

Sam
