Supporting information requirements

Where a development proposal is likely to affect features of biodiversity or geological conservation interest, you will need to submit, with the application, sufficient information and assessments to allow the local planning authority to determine the proposal.

Failure to submit all information required will result in your application being deemed invalid. It will not be considered valid until all information required by the local planning authority has been submitted.

Your local planning authority will be able to advise on the content of any assessments that may be required.

Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in [Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 \(as amended\)](#)) would apply?

- ☐ Yes
- ☒ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in [The Environment Act 2021](#): "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

Reason biodiversity net gain does not apply:

Development subject to the de minimis exemption (development below the threshold)

What best describes the size of your site?:

Under 25 square metres

Please justify the reason why biodiversity net gain does not apply:

The proposed works are confined to the hard landscaped confines of the existing colonnade and consequently the proposed works can be considered as being confined 'solely to a sealed surface' which indicates that the proposed development falls under the 'de-minimis exemption' for biodiversity net gain.

Note: Please read the help text for further information why developments may be exempt or not in scope.

- ☒ No

Trade Effluent

Does the proposal involve the need to dispose of trade effluents or trade waste?

- ☐ Yes
- ☒ No

Residential/Dwelling Units

Does your proposal include the gain, loss or change of use of residential units?

- ☐ Yes
- ☒ No

All Types of Development: Non-Residential Floorspace

Does your proposal involve the loss, gain or change of use of non-residential floorspace?

Details of the pre-application advice received

"The current structure, constructed primarily from wood, reads as a temporary structure that is out of keeping with the surrounding conservation area, within the setting of listed structures.

In the past decade, there have already been external alterations employed to the wider building, particularly when it comes to infilling archways.

Alterations have been made to entrance on the corner of Albert Square and Brazennose Street, consisting of new double glazed windows and a glazed door with aluminium frames finished in bronze anodised.

An infill in the archway where the current structure is currently sited, carried out in a similar manner, could be supported by the City Council, as it would continue the established precedent of archway infills across this building.

The side door/access to the structure should not have a roller shutter and should be of a similar material/design.

Given that the structure will be housing tables and chairs, instead of clear glazing, it might be a consideration to see if back painted glazing, frosted glazing, or a similar type of solution that retains the overall glazed effect of the established precedent across the lower elevations but somewhat screens the appearance of the tables and chairs housed in the structure, should be investigated".

Authority Employee/Member

With respect to the Authority, is the applicant and/or agent one of the following:

- (a) a member of staff
- (b) an elected member
- (c) related to a member of staff
- (d) related to an elected member

It is an important principle of decision-making that the process is open and transparent.

For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.
