Householder Waste

A secure bin store will be located within the site curtilage along western party fence boundary, refer to drawing number 24/089/EW01 – Proposed External Works for details.

The proposed dwelling will be provided with dedicated waste and recycling containers via Manchester City Council. These are as follows,

- 140 litre grey refuse wheeled bin - general household waste
- 240 litre brown refuse wheeled bin - mixed recycling waste (glass/cans/plastics)
- 240 litre blue refuse wheeled bin - paper and card waste
- 240 litre green refuse wheeled bin - food and garden waste.

The position of the secure bin store area will enable easy access for the resident and a short distance to move the bins to the collection point on the relevant day. The refuse vehicle can stop on the public highway to undertake the collection.
