Appendix 5 – Swept Path

1.0 Introduction

- 1.0 iRIS Sustainable Planning has been appointed to prepare this Transport Assessment (TA) in support of a planning application for a proposed SEMH School comprising 1150 sq meters GFA at Miller House, Lord Street, Cheetham Hill, Manchester, M4 4FP.
- 1.1 This TA assesses the traffic impact associated with the 1150 sq m of GFA. Background
- 1.2 The development is located at the former Miller House and is currently disused, having formerly been occupied by E class use.
- 1.3 **Figure 1** shows the location of the application site in relation to the immediate location and wider surrounding area. The proposed site layout plan for the application site is included in **Appendix 1**.

2.0 Policy Context

- 2.1 The following paragraphs outline the relevant planning policies in respect of the proposed development, including how the proposals would comply with these planning policies in relation to highways and traffic impact.

National Planning Policy Framework (NPPF)

- 2.2 In March 2012, the Department for Communities and Local Government published the NPPF document which replaces historical National Planning Policy. This has since been updated and a revised NPPF document was published in July 2018 and the latest in December 2024.
- 2.3 The NPPF constitutes guidance for local planning authorities and decision-takers both in drawing up plans and as a material consideration in determining applications.
- 2.4 Planning law requires that applications for planning permission must be determined in accordance with the local development plan, unless material considerations indicate otherwise. It suggests that encouragement should be given to solutions which support reductions in greenhouse gas emissions and reduce congestion. In preparing Local Plans, local planning authorities should therefore support a pattern of development which, where reasonable to do so, facilitates the use of sustainable modes of transport.
- 2.5 Part 9 of the revised December 2023 NPPF relates to ‘Promoting sustainable transport’ and highlights the needs for transport issues to be considered from the earliest stages of development proposals, *“so that: a) the potential impacts of development on transport networks can be addressed; b) opportunities from existing or proposed transport infrastructure, and changing transport technology and usage, are realised – for example in relation to the scale, location or density of development that can be accommodated; c) opportunities to promote walking, cycling and public transport use are identified and pursued; d) the environmental impacts of traffic and transport infrastructure can be identified, assessed and taken into account – including appropriate opportunities for avoiding and mitigating any adverse effects, and for net environmental gains; and e) patterns of movement, streets, parking and other transport considerations are integral to the design of schemes, and contribute to making high quality places.”*
- 2.6 In relation to applications for development, paragraph 116 of the revised NPPF stipulates that, “ applications for development should: a) give priority first to pedestrian and cycle movements, both within the scheme and with neighbouring areas; and second – so far as possible – to facilitating access to high quality public transport, with layouts that maximise the catchment area for bus or other public transport services, and

appropriate facilities that encourage public transport use; b) address the needs of people with disabilities and reduced mobility in relation to all modes of transport; c) create places that are safe, secure and attractive – which minimise the scope for conflicts between pedestrians, cyclists and vehicles, avoid unnecessary street clutter, and respond to local character and design standards; d) allow for the efficient delivery of goods, and access by service and emergency vehicles; and e) be designed to enable charging of plug-in and other ultra-low emission vehicles in safe, accessible and convenient locations.”.

- 2.7 Paragraph 115 of the Revised NPPF is key in terms of clarifying when a development should or should not be allowed planning permission. Paragraph 115 reads as follows: *“Development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network would be severe.”*
- 2.8 The outcomes of this report demonstrate that the proposal would not have an unacceptable impact on highway safety, neither would the residual cumulative impacts on the road network be considered ‘severe’. On this basis, it is considered that the proposed development is planned in accordance with the Revised NPPF policy.

Regional Transport Policy

- 2.9 Greater Manchester Transport Strategy 2040 sets out 4 key goals: Supporting Sustainable Economic Growth, Protecting Our Environment, Improving Quality of Life for All, and Developing an innovative City-Region. *“In 2019, we set out our ambition to improve our transport system so that - by 2040 - 50% of all journeys in Greater Manchester are made by public transport or active travel, supporting a reduction in car use to no more than 50% of daily trips. This will mean one million more sustainable journeys every day in Greater Manchester by 2040, enabling us to deliver a healthier, greener and more productive city-region. We call this the transport ‘Right Mix’. Achieving the Right Mix is expected to lead to zero net growth in motor vehicle traffic in Greater Manchester between 2017 and 2040.”*

The strategy sets out the ambition to “enable people to move seamlessly between services on a single, high quality, easy-to-use network; providing choice and supporting low-car lifestyles, made possible by integrated land use and transport planning.” It goes on to say “A fundamental aspiration of the 2040 Transport Strategy is to provide Greater Manchester’s residents, visitors and businesses with real choice in how they and their goods travel. We must provide sustainable travel options that offer an attractive alternative to the private car and minimise the negative impacts of freight traffic.”

Integration with Spatial Planning

- *A further fundamental aspect of this this will be minimising the need to travel. This will be achieved by creating local neighbourhoods where people can live, work and access services and shops, alongside behavioural change, such as mode shift and flexible and home working. Integration with spatial planning is critical in influencing people’s travel choices. Fundamentally, the transport network needs to connect the places people live with the places where they study, work and visit. Locating housing close to facilities and public transport tends to reduce car use. While most of Greater Manchester is served by public transport, some developments have been designed around the car, making them difficult to reach in any other way.*
- The document goes on to say;

TfGM and local planning authorities will continue to work with developers to better integrate transport and new development in accordance with the principles of:

- *Reducing the need to travel;*
- *Reducing the need to travel by car, and the distance travelled;*
- *Maximising accessibility by sustainable modes;*
- *Making the best use of existing infrastructure, particularly through increasing the density of development close to public transport nodes;*
- *Maximising opportunities to provide additional public transport; and*
- *Designing to encourage active travel. Network management and safety*

Local Policy

2.10 The Manchester City Centre Transport Strategy to 2040 sets out seven ambitions for the city.

- Ambition 1: Walking is the main way of getting around the city centre;
The city centre is safe and easy to walk around with clear, well-signed routes.
Pavements and public spaces will be high quality, green and accessible; catering for everyone, no matter what their age or mobility.

- Ambition 2: The city centre is cleaner, greener and less congested;
Traffic levels and pollution in the city will be reduced, through the removal of non-essential and polluting vehicles traveling into and across the city centre.
- Ambition 3: More people choose to cycle to destinations within the city centre
There is an attractive, safe, protected and efficient cycling network into and through the city centre, delivered as part of our city-region's proposed Bee Network. Cycling is supported with good parking facilities close to key destinations, and hire bikes are easy to access in the city centre.
- Ambition 4: The city centre benefits from better public transport connections
Manchester and Salford city centres are well connected by rail to other cities and towns (to support commuting, business and leisure trips). There is sufficient capacity on peak hour Metrolink, bus and rail services, and better integration between modes to ensure that public transport is an attractive alternative to car travel. Public transport operating hours and service patterns support travel needs at evenings and weekends, particularly for leisure and commuting trips. Cross-city services are convenient, reliable, safe and secure, clean, quiet and accessible to all.
- Ambition 5: Parking in the city centre is smarter and integrated with other modes
Car parking is reduced and appropriately located in the city centre but remains available to those with specific mobility needs that rely upon accessible parking provision. Parking will be reviewed close to city centre public transport hubs, with people encouraged to travel to those locations using the public transport and active travel options provided. Outside of the city centre, car parking is smarter and better integrated with other modes of travel.
- Ambition 6: Goods are moved and delivered sustainably and efficiently into and within the city centre
Essential goods can access our city centre, with a shift towards cleaner, more efficient vehicles and processes that minimise the negative impacts of deliveries and servicing.
- Ambition 7: Innovation is embraced where it benefits the city centre and its users
We support creating a better travel experience in our city centre using new technologies and emerging methods of travel. This includes embracing new ways of working, to optimise and improve transport services, customer information and asset management.

- 2.11 Therefore, this TA has been prepared to comply with the transport strategies and policies outlined in this section, where sustainable travel would be encouraged, and capacity assessments would be undertaken to demonstrate that the proposed development would not create severe impact on the surrounding highway network.

3.0 Existing Conditions

Site Location

- 3.1. The site is located to the north east of Lord Street, south west of Stocks Street, which is situated in the Green Quarter of Manchester, approximately 1.5 km to the north of Manchester City Centre.
- 3.2. The site location in relation to the local highway network and surrounding land uses is shown in **Figure 1**. The site is bounded by industrial units to the north and residences to the other sides.
- 3.3. The site itself is currently unoccupied, having formerly been in use as office Office and storage space for online retail.
- 3.4. The site has a GMAL level of 8 with a score of 42.87.

Planning History

- 3.5. In 2021, the site was granted permission for **130912/FO/2021** | Creation of a homeless accommodation centre (Sui Generis) with ancillary healthcare office/facility together with demolition works and elevation alterations.

Surrounding Highway Network

- 3.6. Lord Street is a single carriageway mixed use road and is subject to 20 mph speed limit. It is constructed to modern standards using modern materials. Lord Street has a carriageway width of 8.7 meters. Footways are provided along both sides of the carriageway and there is a good system of street lighting. Lord Street terminates to the east at the simple priority junction with Red Bank and to the west forms a signalised crossroads junction with the A665 Cheetham Hill Road.
- 3.7. Stocks Street is a single carriageway industrial road and is subject to 20 mph speed limit. It is constructed to modern standards using modern materials. Stocks Street has a carriageway width of 8.4 meters. Footways are provided along both sides of the carriageway and there is a good system of street lighting. Stocks Street joins Lord Street at its southern extremity, and it meets St Chad's Street at a simple crossroads junction to the north.
- 3.8. St Chad's Street is a single carriageway mixed use road and is subject to 20 mph speed limit. It is constructed to modern standards using modern materials. St Chad's Street has a carriageway width of 7.1 meters. Footways are provided along both sides of the carriageway and there is a good system of street lighting. St Chad's Street joins the A665 Cheetham Hill Road at a simple priority junction.

Wider Highway Network

- 3.1. The A665 Cheetham Hill Road is a 2 + 2 road at the vicinity of the junctions with Lord Street and St Chad's Street. The A665 Cheetham Hill Road links to the Manchester Ring Road to the south and terminates in Radcliffe to the north west. The A665 Cheetham Hill Road provides links to the A576 Middleton Road and on to the M60.

Road Safety

- 3.2. Personal Injury Accident (PIA) data has been obtained from Crashmap.co.uk for the latest available full five-year period (2020-2024). The study area includes Lord Street, Stocks Street, St Chad's Street and the section of the A665 Cheetham Hill Road between the signalised junction with Derby Street to the north and the junction with the Ring Road to the south. The PIA data for is included in **Appendix 2** and summaries of these injury accidents is included in the following paragraphs.
- 3.3. No PIAs took place on Lord Street, Stocks Street or St Chad's Street during the 5 year period 2020 to 2024 inclusive.
- 3.4. A total of 11 PIAs occurred on the A665 Cheetham Hill Road between the signalised junction with Derby Street to the north and the junction with the Ring Road to the south, between in the 5 year period 2020 and 2024 inclusive. 8 of these collisions were of slight severity, 3 serious and 0 fatal.
- 3.5. These injury accidents are summarised in **Table 1** below and the complete accident data is available in **Appendix 2**:

Road / Junction	Car	P2W	Cyclist	Pedestrian	Other
A665	10		2	1	Taxi - 1

- 3.6. The first serious PIA took place at 1117 on 28th March 2022 at the junction of the A665 Cheetham Hill Road and Manchester Ring Road. The weather was fine without high winds and the road surface was dry. The incident occurred when a car in the act of turning right collided with a vehicle passing another moving vehicle, seriously injuring the driver of the vehicle turning right and slightly injuring the passenger of the other moving vehicle.
- 3.7. The second serious PIA took place at 1830 on 17th December 2021 at the junction of the A665 Cheetham Hill Road and Derby Street. It was dark with streetlamps present and lit and the weather was fine without high winds and the road surface was dry. The incident occurred when a car waiting to turn right was struck by a vehicle performing a U turn, seriously injuring the driver of the vehicle turning right.

- 3.8. The third serious PIA took place at 1005 on 19th April 2024 at the junction of the A665 Cheetham Hill Road and Derby Street. It was dark with streetlamps present and lit and the weather was fine without high winds and the road surface was dry. The incident occurred when a cyclist came off his bike. No other vehicle was involved and there is no record of the cyclist striking anything either in or out of the carriageway.
- 3.9. These reports suggest that there are no patterns attributable to defective road conditions or other physical characteristics associated with the road layout, such as visibility which would advocate an identifiable course of action being required. As such, no further PIA analysis is considered necessary at this stage or as part of this planning application.

Parking

- 3.10. Appendix B in the Manchester Core Strategy (2012 – 2027, titled ‘Parking Standards’, states that “maximum standards for car parking do not apply to the City Centre as each development in the City Centre will be considered on a case by case basis”
- 3.11. 2 number parking spaces will be provided with the development.
- 3.12. Double yellow line parking restrictions are in place on both sides of Stocks Street and Lord Street.
- 3.13. Drop offs will be at the roadside on Stocks Street. It is proposed that a drop off point and loading bay is created on Stocks Street to enable school taxi’s to drop off and pick up whilst causing minimal disruption. This drop off point and loading bay is marked on the Site Plan in Appendix 1.

4.0 SUSTAINABLE TRAVEL ACCESSIBILITY

Introduction

- 4.1. This section sets out the existing walking, cycling and public transport facilities in proximity of the site. The 15 and 30 minute walking, cycling and public transport isochrones are included in **Appendix 3**.

Pedestrian Accessibility

- 4.2. The Chartered Institution of Highways and Transportation (CIHT) publication ‘Guidelines for Providing for Journeys on Foot’ (2000) describes what are considered acceptable walking distances for pedestrians without mobility impairment.
- 4.3. The guidance suggests that for commuting, school, and sight -seeing, up to 500m is the desirable walking distance, up to 1,000m is an acceptable walking distance, and 2,000m is the preferred maximum walking distance. The 2km ‘preferred maximum’ walking distance catchment suggest that students and potential staff residing in Hulme,

Cheetham Hill, Lower Broughton and Manchester City Centre areas would have the opportunity to walk to school.

- 4.4. In addition to local residential areas, the 1km 'acceptable' walking distance from the site covers Victoria Tram Stop, bus stops on the A665 Cheetham Hill Road and Texaco Garage on the A665 Cheetham Hill Road.
- 4.5. In terms of existing pedestrian infrastructure, footways are provided along Lord Street, Stocks Street, the A665 Cheetham Hill Road and St Chad's Street and there is a good system of street lighting.

Cycling Accessibility

- 4.6. It is generally accepted that cycling has the potential to substitute short car trips, particularly those under 5 km, and to form part of a longer journey by public transport. Average cycle time for 5 km is 15 minutes.
- 4.7. **Appendix 3** illustrates a 15 minute catchment from the site, which shows that a sizeable residential catchment area is within acceptable cycling distance.
- 4.8. As shown, the 30 minute catchment covers includes Manchester and its surrounding towns and villages including Salford, Droylesden, Failsworth, Prestwich and Hulme where there are a range of shops and recreational opportunities.
- 4.9. The site is well equipped for cycling, with on road cycle lanes on the A665 Cheetham Road, within 270 meters of the site access. Segregated routes are available on Great Clowes Street.
- 4.10. National Cycle Route 6 runs 2 kilometers from the site. National Cycle Network Route 6 passes through Watford, Luton, Milton Keynes, Northampton, Market Harborough, Leicester, to Sheffield, Manchester and Lancashire to Windermere.

Public Transport Accessibility

Bus

- 4.11. In relation to bus accessibility, the Chartered Institute of Highways and Transportation's (CIHT) 'Buses in Urban Developments, January 2018' publication, recommends that the maximum walking distance to 'single high-frequency routes (every 12 minutes or better)' should be 400m. For less frequent bus routes, the maximum recommended walking distance is 300m.
- 4.12. The closest serviced bus route is located on the A665 Cheetham Hill Road, less than 250 meters from the site. Services from this stop include the 135 Bury to Manchester Picadilly Gardens, which operates at 10 minute intervals Mon-Sun, and the 41 Sale to

Higher Crumpsall / Middleton, which operates at 20 minute intervals Mon- Sat and 30 minutes on Sundays. A summary of these routes is included in **Appendix 3**.

- 4.13. The GMAL score for the site is 42.87 with a rating of 8.

Tram

- 4.14. The closest Tram Stop is Victoria, which is located approximately 900m from the site, approximately 13 minutes walk. This stop provides frequent, regular services across the Manchester tram network. There is approximately 1 departure per minute.

Train

- 4.15. Additionally, Manchester Victoria Train Station is located 900m from the site, approximately 13 minutes walk. Manchester Victoria Railway Station provides service to Manchester Airport, Newcastle, Liverpool, Wigan, Clitheroe and Hull and provides links to the national rail network.

Summary

- 4.16. The information contained in this section of the report demonstrates that the site is situated in a sustainable location, within walking distance of local residential areas, amenities and bus stops.
- 4.17. The existing pedestrian and cycling infrastructure would facilitate staff walking and cycling to the site from nearby residential areas and public transport interchanges.

5.0 PROPOSED DEVELOPMENT

Overview

- 5.1. The proposed development comprises up to 1150 sq. m. of GFA. The proposed site layout plan is included in **Appendix 1**.
- 5.2. Vehicular access to the development is from Stocks Street.
- 5.3. The access point measures 4.1 meters.
- 5.4. No changes are proposed to be made to the access point.
- 5.5. At the access to Stocks Street, a visibility splay of 2.5m x 25m is available, in keeping with the requirements for a 20 mph speed limit.
- 5.6. It is noted that 'no waiting at any time' restrictions (double yellow lines) are currently in place along Stocks Street, although it is noted that on-street parking activity does take place. This is an enforcement matter for MCC to ensure the visibility splays remain unobstructed.

Parking Provision

Car Parking Spaces

- 5.7. There are no guidelines for Schools set out within the Manchester City Council parking standards, with the closest being for higher and further education. This requirement is for 1 parking space per 2 number staff, with disabled provision being determined on a case by case basis.
- 5.8. 2 no. parking will be provided with this facility. Vehicles can enter and exit in forward gear.
- 5.9. Plentiful parking is provided in the local area, with Red Bank Carpark on Faber Street being within 300 meters from the site entrance. Additional parking is available commercially at Park Place Carpark on Park Place, 300 meters from the facility.
- 5.10. Additionally, the site has a GMAL rating of 8, indicating that it is highly accessible.

Cycle Parking

- 5.11. For bicycles, again there are no guidelines for schools set out within the Manchester City Council parking standard. The parking standard for higher and further education is for 1 space per 5 staff plus 1 per 3 number students. It is argued that, whilst the provision for staff would be applicable in this case, the provision for pupils is in excess of requirements, with the majority of SEMH students requiring transport to the school. It would be expected that high numbers of pupils would be travelling to school by school minibus or school taxi in keeping with the pattern established among other, similar schools. Cycle parking for 9 bicycles will be provided, in line with the 1 per 5 staff figure, with 45 number staff being expected to work at the facility.

Motorcycle Parking

- 5.12. No separate dedicated motorcycle parking has been provided.

Servicing Arrangements

- 5.13. Refuse collection will be from the newly created loading bay in front of the school on Stocks Street, the exact location of which will be agreed with highways officers at Manchester City Council. The refuse storage will be no more than 30 meters drag from the loading bay.

6.0 Trip Rates & Traffic Generation

- 6.1. In order to predict the traffic generation for the proposed development, the Trip Rate Information Computer System (TRICS – Ref. 2), has been examined for the category of 'Education – Primary Schools'. This was chosen as the nearest representation to the SEMH category. Sites with a population within 1 mile of 5000 to 50,000 and a 5 mile population of 50,000 to 500,000 have been selected. The resulting TRICS output is included in **Appendix 4** and summarised below in **Table 2**. **Table 3** shows the resultant trip generation for the proposed development.

Table 2 Traffic Generation Rates (per 100 sq.m Floorspace)

Time Period	Traffic Generation Rate (Arrivals)	Traffic Generation Rate (Departures)	Total Traffic Generation Rate
Weekday A.M. Peak (0800 – 0900 hrs) All Vehicles	4.055	3.467	7.522
Weekday P.M. Peak (1700 – 1800 hrs) All Vehicles	0.158	0.385	0.543
Weekday (0700 – 1900 hrs.) All Vehicles	10.613	10.566	21.179

Table 3 Traffic Generation (1150 sq.m Floorspace)

Time Period	Vehicles In	Vehicles Out	Total
Weekday A.M. Peak (0800 – 0900 hrs) All Vehicles	47	40	87
Weekday P.M. Peak (1700 – 1800 hrs) All Vehicles	2	4	6
Weekday (0700 – 1900 hrs.) All Vehicles	122	122	244

*Discrepancy due to rounding.

- 6.2. It can be seen from Table 3 that the proposed development is predicted to generate up to 87 vehicle movements during each of the weekday peak hours and 244 vehicle movements during a typical weekday (7 a.m. – 7 p.m.). Due to the situation of the site, it is likely that these 87 trips will be distributed between the Stocks Street / Lord Street junction and the Stocks Street / St Chad's Street junctions and on to Cheetham Hill Road.
- 6.3. To provide a measure for the impact of the development traffic on the surrounding highway network, average annual traffic data for Cheetham Hill Road in the vicinity of its junction with Lord Street has been obtained from the TfGM website (<http://www.gmtu.gov.uk>). Table 4 provides the traffic counter reference and average

daily trips at peak times. The data used is that obtained in 2018 as the most recent non-covid data.

Link	Counter Reference	AM average	PM Average
Cheetham Hill Road	1368	3671	4807

Traffic Distribution

- 6.4. For the purposes of assessing the impact of the development traffic, it has been assumed that all the development traffic would access the site via Cheetham Hill Road.
- 6.5. Using the above trip generations and the existing AADT on Cheetham Hill Road, the impact of the development traffic has been calculated and provided in **Table 5**.

Link	Base	Development	% Increase	PM Base	Development	% Increase
Cheetham Hill Road	3671	87	2.4%	4807	6	0.12%

- 6.6. It can be seen from Table 5.3 that the impact of the development traffic on Cheetham Hill Road is approximately 2%. This is considered to be minimal and imperceptible to existing road users.
- 6.7. This level of additional traffic is not likely to result in a material impact on the surrounding highway network, and is instead likely to be imperceptible to existing road users particularly as they will be generally against the prevailing traffic.
- 6.8. Furthermore, due to the proposed level of car parking and accessibility of the site, the proposed development is likely to exhibit lower levels of vehicular traffic than indicated in the TRICS assessment above. This would further lessen the development highway impact.
- 6.9. It is also worth noting that the traffic associated with the existing uses on the site has not been taken into account and therefore the above assessments presents a worst case scenario.
- 6.10. In light of the above, it is reasonable to conclude that the proposed development would not result in a severe impact on the surrounding area in terms of highways, traffic and transportation.
- 6.11. The development will be accessed from the wider highway network via Lord Street / A665 Cheetham Hill Road and St Chad's Street / A665 Cheetham Hill Road Junctions.

- 6.12. In terms of vehicle movements to, and from the site by car, it is expected that 1/2 of the vehicles would access the site via Lord Street / A665 Cheetham Hill Road with the rest of movement being via St Chad's Street / A665 Cheetham Hill Road. Therefore it would be likely that 44 of the total morning visits would be via Lord Street / A665 Cheetham Hill Road Junction with 44 being via St Chad's Street / A665 Cheetham Hill Road.
- 6.13. Therefore it would be expected that the amount of vehicles accessing the site via the St Chad's Street and Lord Street Junctions would be less than 1 vehicle per minute in either weekday peak hour.
- 6.7. It is considered that this level of traffic increase would be highly unlikely to cause operational or safety issues on the network., which is currently operating within its capacity.

7.0 SUMMARY AND CONCLUSIONS

- 7.1. This Transport Assessment has been produced to support the full planning application for a proposed School comprising 1150 sq m of floor space in Miller House, Lord Street, Cheetham Hill, Manchester, M4 4FP.
- 7.2. The TA shows that the existing highway network in the vicinity of the proposed development site operates satisfactorily and has a, relatively, good road safety record with no evidence of any significant highway safety problems that would be materially affected by the traffic that will be generated by the proposed development.
- 7.3. The TA shows that the proposed development will generate up to 40 vehicular trips during the weekday peak period. As Lord Street, Stocks Street and St Chad's Street have a relatively low level of traffic at the weekday peaks, this is unlikely to affect the operation of the junctions of Lord Street / A665 Cheetham Hill Road and St Chad's Road / A665 Cheetham Hill Road negatively. Traffic distribution indicates that less than 1 vehicular movements per minute will take place through these junctions at the peak periods, therefore the wider highway network which will continue to operate satisfactorily.
- 7.4. The proposed development will be served from the current access from Stocks Street.
- 7.5. The proposed development will be located close to the existing bus service that operates along the A665 Cheetham Hill Road to allow trips by public transport between the proposed development, Sale, Bury, Picadilly Gardens and stops in between.
- 7.6. The proposed development will also be well located for pedestrian access to the existing shops and amenities, including those located on the A665 Cheetham Hill Road.
- 7.7. Therefore, the proposed development will be accessible by sustainable transport and meets the requirements of the National Planning Policy Framework (NPPF), in this regard.

Compiled from data for the period Thu 13-Nov-2025 to Wed 19-Nov-2025. Times not in bold are estimated by using the distance between the stops.

From 1 September

135

We're introducing new late night/early morning journeys from Thursday night/ Friday morning to Saturday night/ Sunday morning, with some journeys starting from Manchester, Shudehill Interchange instead of Piccadilly Gardens.

Bus

Replacement

135

 Easy access on all buses

Bury
Whitefield
Besses o' th' Barn
Heaton Park
Cheetham Hill
Cheetham
Manchester

From 1 September 2025

For public transport information
visit **beenetwork.com**

or phone **0161 244 1000**

7am – 8pm Mon to Fri

8am – 8pm Sat, Sun & public holidays

This timetable is also available at **beenetwork.com**

For information about using public transport phone our friendly team on **0161 244 1000** 7am – 8pm Mon to Fri 8am – 8pm Sat, Sun and public holidays or download the Bee Network app

Other formats

To ask for leaflets to be sent to you, or to request large print, Braille or recorded information phone **0161 244 1000** or visit **beenetwork.com**

Easy access on buses

All buses have no steps at the entrance, making getting on and off easier. Low floor buses have a ramp for access and a dedicated space for wheelchairs and pushchairs inside the bus. Ask the driver for any assistance you require.

Using this timetable

Timetables show the direction of travel, bus numbers and the days of the week. Main stops on the route are listed on the left. Where no time is shown against a particular stop, it means the bus does not stop there on that journey.

Check any letters which are shown in the timetable against the key at the bottom of the page.

Where to find information about service changes

Visit **beenetwork.com** or download the Bee Network app.

Check the service change posters displayed in the bus station or pick up a service change leaflet from your local library, town hall, shops, post office, community centre and lots of other places.

Lost property

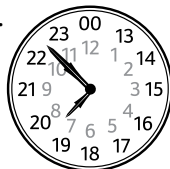

For lost property information visit **beenetwork.com/lost-property**

Using the 24 hour clock

Times are shown in four figures. The first two are the hour and the last two are the minutes.

0753 is 53 minutes past 7am morning.

1953 is 53 minutes past 7pm evening.

Information and tickets

There's a range of tickets to use on buses and multi-modal tickets for buses, trams and trains. For more information on which is the best ticket for you, visit **beenetwork.com**, download the Bee Network app or call into one of our information and ticket offices in bus stations where the team will provide you with journey planning advice on buses, trams and trains.

Information and tickets office

TRIP RATE CALCULATION SELECTION PARAMETERS:

Land Use: 04 - EDUCATION

Category: A - PRIMARY

Selected Vehicle Type: Total Vehicles

Selected regions and areas:

02	SOUTH EAST		
	HC	HAMPSHIRE	1 day
	HF	HERTFORDSHIRE	1 day
	ON	LUTON	1 day
03	SOUTH WEST		
	CW	CORNWALL	1 day
	GS	GLOUCESTERSHIRE	1 day
04	EAST ANGLIA		
	CA	CAMBRIDGESHIRE	1 day
	NF	NORFOLK	1 day
05	EAST MIDLANDS		
	NM	WEST NORTHAMPTONSHIRE	1 day
06	WEST MIDLANDS		
	WK	WARWICKSHIRE	1 day
	WM	WEST MIDLANDS	1 day
09	NORTH		
	CU	CUMBERLAND	1 day
	TV	TEES VALLEY	3 days
	TW	TYNE & WEAR	1 day
10	WALES		
	CF	CARDIFF	1 day
11	SCOTLAND		
	EB	CITY OF EDINBURGH	1 day

This section displays the number of survey days per TRICS® sub-region in the selected set.

Audit Code: 3fc302e4-92b0-4d0e-bbd9-825f53f734d4

Primary Filtering Selection:

This data displays the chosen trip rate parameter and its selected range. Only sites that fall within the parameter range are included in the trip rate calculation.

Parameter:	GFA
Actual Range:	310 to 9000 (units:sqm)
Range Selected by User:	310 to 9000 (units:sqm)
Parking Spaces Range:	0 - 161

Public Transport Provision:

Selection by:	All Surveys Included
Date Range:	01/01/16 to 19/06/24

This data displays the range of survey dates selected. Only surveys that were conducted within this date range are included in the trip rate calculation.

Selected survey days:

Friday	3 days
Monday	3 days
Thursday	4 days
Tuesday	4 days
Wednesday	3 days

This data displays the number of selected surveys by day of the week.

Selected survey types:

Manual count	17
Direction ATC Count	0

This data displays the number of manual classified surveys and the number of unclassified ATC surveys, the total adding up to the overall number of surveys in the selected set. Manual surveys are undertaken using staff, whilst ATC surveys are undertaken using machines

Selected Locations:

Edge of Town	6 days
Neighbourhood Centre	3 days
Suburban Area	8 days

This data displays the number of surveys per main location category within the selected set. The main location categories consist of Free Standing, Edge of Town, Suburban Area, Neighbourhood Centre, Edge of Town Centre, Town Centre and Not Known.

Selected Location Sub Categories:

No Sub Category	1 days
Residential Zone	15 days
Village	1 days

This data displays the number of surveys per location sub-category within the selected set. The location sub-categories consist of Commercial Zone, Industrial Zone, Development Zone, Residential Zone, Retail Zone, Built-Up Zone, Village, Out of Town, High Street and No Sub Category.

Inclusion of Servicing Vehicle Counts:

Servicing vehicles Excluded	6 days
Servicing vehicles Included	11 days

Audit Code: 3fc302e4-92b0-4d0e-bbd9-825f53f734d4

Secondary Filtering Selection:

Use Class:

F1(a)	17 surveys
-------	------------

This data displays the number of surveys per Use Class classification within the selected set. The Use Classes Order (England) 2020 has been used for this purpose, which can be found within the Library module of TRICS®.

Population within 500m Range:

136 - 8587

Population within 1 mile:

10,001 to 15,000	2 surveys
15,001 to 20,000	4 surveys
20,001 to 25,000	3 surveys
25,001 to 50,000	5 surveys
5,001 to 10,000	3 surveys

This data displays the number of selected surveys within stated 1-mile radii of population.

Population within 5 miles:

100,001 to 125,000	3 surveys
125,001 to 250,000	7 surveys
250,001 to 500,000	6 surveys
50,001 to 75,000	1 surveys

This data displays the number of selected surveys within stated 5-mile radii of population.

Car ownership within 5 miles:

0.6 to 1.0	10 surveys
1.1 to 1.5	7 surveys

This data displays the number of selected surveys within stated ranges of average cars owned per residential dwelling, within a radius of 5-miles of selected survey sites.

Audit Code: 3fc302e4-92b0-4d0e-bbd9-825f53f734d4

Petrol filling station:

This data displays the number of surveys within the selected set that include petrol filling station activity, and the number of surveys that do not.

Travel Plan:

No	16 surveys
Yes	1 surveys

This data displays the number of surveys within the selected set that were undertaken at sites with Travel Plans in place, and the number of surveys that were undertaken at sites without Travel Plans.

PTAL Rating:

No PTAL Present	17 surveys
-----------------	------------

This data displays the number of surveys within the selected set that include petrol filling station activity, and the number of surveys that do not.

COVID-19 Restrictions:

No

Audit Code: 3fc302e4-92b0-4d0e-bbd9-825f53f734d4

Total Rates:			10.613	10.566	21.179

This section displays the trip rate results based on the selected set of surveys and the selected count type (shown just above the table). It is split by three main columns, representing arrivals trips, departures trips, and total trips (arrivals plus departures). Within each of these main columns are three sub-columns. These display the number of survey days where count data is included (per time period), the average value of the selected trip rate calculation parameter (per time period), and the trip rate result (per time period). Total trip rates (the sum of the column) are also displayed at the foot of the table.

To obtain a trip rate, the average (mean) trip rate parameter value (TRP) is first calculated for all selected survey days that have count data available for the stated time period. The average (mean) number of arrivals, departures or totals (whichever applies) is also calculated (COUNT) for all selected survey days that have count data available for the stated time period. Then, the average count is divided by the average trip rate parameter value, and multiplied by the stated calculation factor (shown just above the table and abbreviated here as FACT). So, the method is: $COUNT/TRP*FACT$. Trip rates are then rounded to 3 decimal places.

The survey data, graphs and all associated supporting information, contained within the TRICS Database are published by TRICS Consortium Limited ("the Company") and the Company claims copyright and database rights in this published work. Audit Code: 3fc302e4-92b0-4d0e-bbd9-825f53f734d4

Parameter Summary:

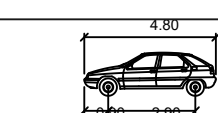

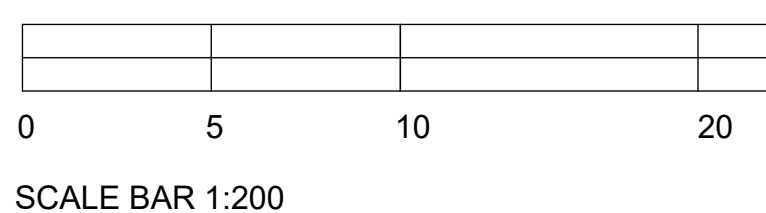

Trip rate parameter range selected:	310 - 9000 (units: sqm)
Survey date date range:	24/03/2016 - 20/06/2024
Number of weekdays (Monday-Friday):	17
Number of Saturdays:	0
Number of Sundays:	0
Surveys automatically removed from selection:	0
Surveys manually removed from selection:	0

This section displays a quick summary of some of the data filtering selections made by the TRICS® user. The trip rate calculation parameter range of all selected surveys is displayed first, followed by the range of minimum and maximum survey dates selected by the user. Then, the total number of selected weekdays and weekend days in the selected set of surveys are show. Finally, the number of survey days that have been manually removed from the selected set outside of the standard filtering procedure are displayed.
