

Notes:
Drawings are based on survey data and may not accurately represent what is physically present.
Do not scale from this drawing. All dimensions are to be verified on site before proceeding with the work.
All dimensions are in millimeters unless noted otherwise.
Purcell shall be notified in writing of any discrepancies.

Width and depth of the existing bench tops should be checked for each individual instance before constructing gutter framing. Any variation in sizes to be highlighted before proceeding

Existing benches to be reinstalled in previous locations as previously installed. Ends of bench seats to be scribed to wall where new plaster work prevents installation as previous.

50mm wide timber support for gutter and bench seat - profile and dimensions to accommodate size of existing seat top and angle of back. Timber studs to either sided of bench and equally spaced. Four per bench seat

All visible fixings to be countersunk below surface and plugged with timber pellets finished to match existing - NBS Ref: **G20-575a**

Timber frame work for bench seat to be fixed to masonry with woodscrews in to wall plugs - minimum 30mm embedment into masonry - NBS Ref: **G20-575a**

Existing metal hardware to be reused or replaced. Existing bench top to be fixed to with wood screws from underside where fixed and not hinged for gutter inspection
- NBS Ref: **G20-575a**

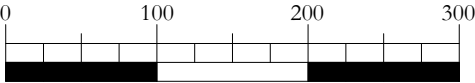

Repair and rebed brickwork if necessary to provide suitable base and backing for timber framing

All timber framing to be isolated from direct contact with masonry using IKO Hyload original dpc
