

The Power 6ft x 4ft pent bike shed is your ideal solution for secure bike storage. Made from Scandinavian timber, it shields your cycles from the elements while providing ample space for gear. Its waterproof design ensures dryness, with lockable double doors for easy access. Protect your bikes and accessories from rust, rot, and decay with this sturdy, weatherproof shed.

Dip treated shiplap tongue & groove cladding is very durable and designed to repel rainwater, and the pent roof is covered and waterproofed by high quality roofing felt with a polyester lining. This ensures the inside of the shed remains completely dry.

Easy access is through double lockable doors that can fitted to the back of the shed or front depending on the location, and 44mm framing gives the structure great strength with corner braces also fitted so that the shed remains rigid.

There's enough interior space for clothing, helmets and other equipment in addition to any cycles, all the hinges are galvanized to be rust resistant and the shed is guaranteed against rot and decay for a decade.
