1.0 Refuse Storage & Disposal Strategy

Refuse and recyclable waste will be separately collected within the new Engineering Building and taken to the external bin stores within the secure compound being constructed as part of the approved works within the planning approval 144410/FO/2025 and shown on OPEB-10A-V9-XX-DR-A-9001_Proposed External Landscape_L4. Two stores are proposed to allow for the separate collection of refuse and recycling.

The College collect refuse and recycling and move the bins to this area at the end of each day, and it is picked up by refuse and recycling trucks which drive into the rear of the site from Whitworth Road and into the secure compound.
