Retail Flag Signage

Commercial
A-B_Signage x 2

700 x 700mm x 100mm deep flag style projector, 3mm mild steel box section. Back-to-back folded trays in 3mm aluminium, which may be fret cut, secured to frame using countersunk, pozidrive screws to returns. Trays to be replaced once tenant moves in with appropriate logo/text. Frame top rail to be pre-drilled close to upper strap fixing, to allow for retrospective running of electrical cable. Frame may be retrospectively fitted with central ACM, LED, carrier panel for double sided sign illumination. Powder coated.

- Proposed fixing method - Affix to mortar wall surface only.

SUBJECT TO SITE SURVEY

NB
No glazing vinyls permitted either internally or externally for both commercial units

RAL TBC

Clements Entrance

A_Manifestation

All manifestations to be installed on all relative windows across site covering main entrances, full height windows, and retail units

Design concept for the main door of the smaller block. Elevation diagram doesn't reflect the final area of installation.

For visual purposes only, not the actual area

Window Manifestation

A_Manifestation

All manifestations to be installed on all relative windows across site covering main entrances, full height windows, and retail units
