Openshaw car park drainage verification report -

Blakedown Sport and Play confirm the drainage to both the synthetic pitch and Car Park area on site at the Openshaw Campus, Manchester College has been installed in accordance with the requirements as noted within the planning discharge notification.
The design is in line with both the planning requirements and the sporting governing bodies for drainage schemes.
We include two As Built drawings and a SUDs management and maintenance document for the completed project.
Images below show the construction of the concrete channel, the installation and final images of the grating channel .
Images also show the completed car park surface showing the gradients, kerbing and outfalls .
