Project EV Pro App

PORTABLE PRO CRM

The Project EV Pro App is a unique EV charging platform, providing you the ability to utilise public charging capabilities and manage and control multiple chargers - from which you can generate a fluid revenue stream.

The Project EV Pro App dashboard is intuitive and user-friendly, allowing you to monitor your charger activity, and review data and analytics to discover new revenue opportunities.

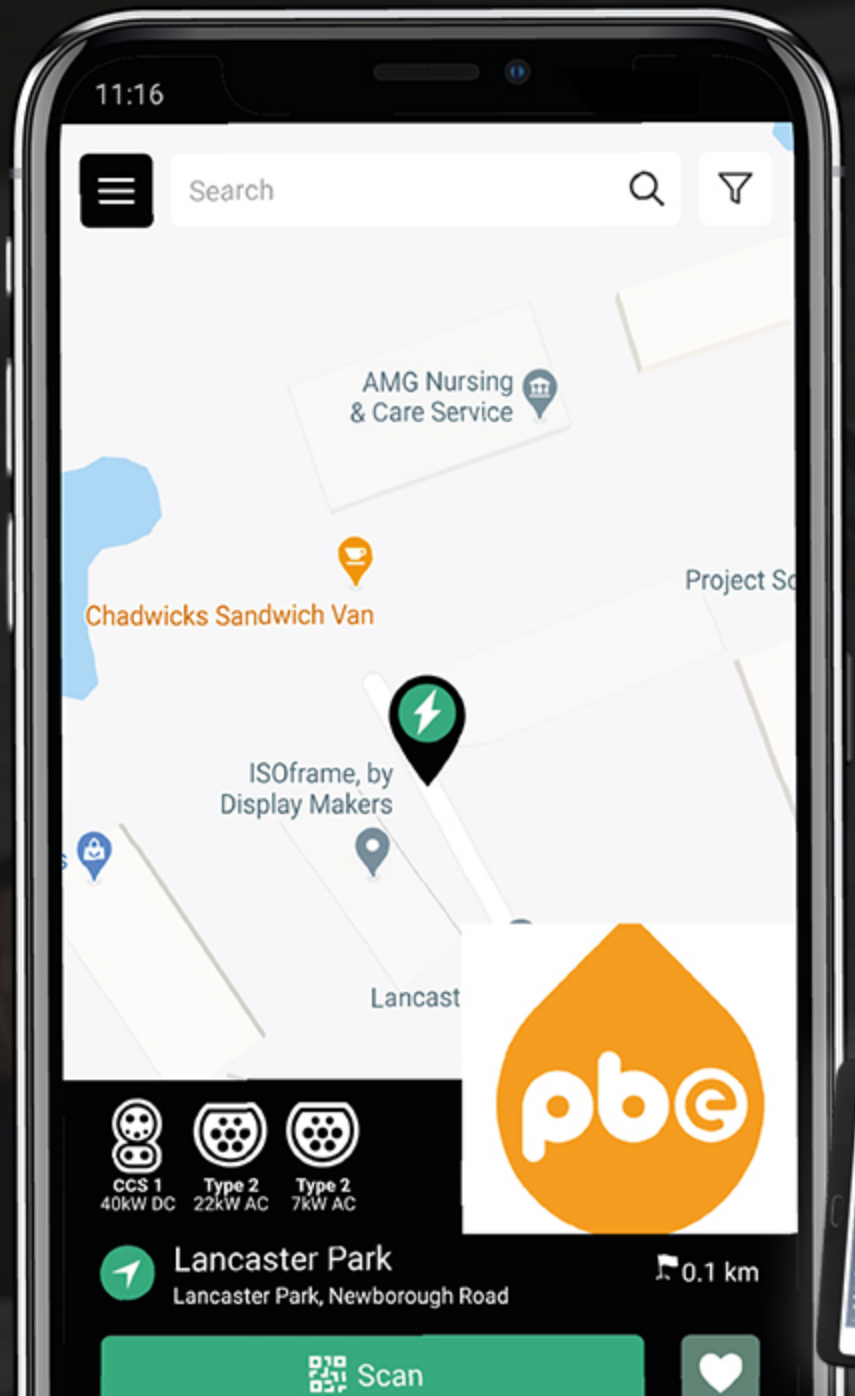

With our RFID function you can assign your staff a designated charging tag, creating a simple workplace charging scheme with the swipe of a card - allowing for more efficient monitoring of expenses costs.

The Right Solution For Your Business If...

- You are looking to assign your staff a designated charging tag, creating a simple workplace charging scheme with the swipe of a card - allowing for more efficient monitoring of expense costs
- You plan to launch a charging network as a Charge Point Operator or extend your existing e-mobility services with a charging infrastructure;
- You operate a fleet of electric vehicles and need a way to manage access and the usage of your EV charging stations;
- Your business offers EV charging to customers/visitors at your premises;
- You have multiple charging stations and you require the provision of an integrated hardware and software solution;
- You manage free EV charging stations and you would like to be able to control access and collect payments, manage expenses for remote chargers.

- Public Charging
- Fleet Management
- Energy Management

PROJECT EV Pro App

The End User Experience

To download the Project EV Pro App you can either scan the QR code on the Project EV Pro App signage or you can search for the app on the Google Play or App Store.

Once downloaded in the Project EV Pro App you can scan the QR code or enter the numeric ID for the EV charge point you want to use.

When your app is connected with the charge point you will be able to manage your charging session in the Project EV Pro App.
