Biodiversity gain plan

Submit a biodiversity gain plan to show how your development will achieve biodiversity net gain.

When to use this form

A biodiversity gain plan shows how a development will achieve 10% biodiversity net gain (BNG). Submit this form to your local planning authority after they approve your planning application.

Unless your development is exempt, you cannot start the development until the LPA approves your biodiversity gain plan and biodiversity metric calculation tool.

4. Biodiversity net gain strategy

4.1 Is the relevant date for the pre-development biodiversity value the same date as the planning application?

☒ Yes
☐ No

4.2 If no, what earlier date did you agree with the LPA?

4.3 How have you met the guidance on 'what counts towards your BNG'?

Find out what you can count towards a development's BNG

Habitat creation, including the creation of areas of mixed scrub, tall forb and modified grassland as well as tree planting to enhance the site post development.

4.4 How will you avoid or minimise impacts to habitats?

Tell us about the steps you've taken on site, including to avoid or minimise the impact on irreplaceable habitats.

The scheme has been designed to reduce the overall impact to habitats. Most of the impacts are to habitats of Low or V.Low distinctiveness. Impacts to Medium distinctiveness habitats (Individual trees) cannot be avoided but has been compensated for by tree planting within the scheme.

4.5 Did you use your local nature recovery strategy to inform the strategic significance of habitats?

This includes other specified strategies if you do not have a local nature recovery strategy.

☒ Yes
☐ No

4.6 How will you achieve the target net gain percentage?

☒ On-site
☐ Off-site
☐ Both

4.7 Are any of your on-site enhancements considered 'significant'?
Find out what counts as a significant on-site enhancement.
☒ Yes
☐ No

4.8 If yes, tell us about the significant on-site enhancements
Include the appropriate planning condition or how you've secured the habitat.

Mixed scrub creation (habitats of medium or higher distinctiveness in the biodiversity metric)

Tree planting (habitats of medium or higher distinctiveness in the biodiversity metric)

Grassland creation (habitats of low distinctiveness which create a large number of biodiversity units relative to the biodiversity value of the site before development)

4.9 How many off-site biodiversity units do you need to meet 10% net gain?

0

4.10 Explain why you're using off-site biodiversity units
Only answer this question if you're planning to use off-site biodiversity units (250 words).

4.11 Explain why you're planning to use statutory biodiversity credits
Only answer this question if you're planning to use statutory biodiversity credits (250 words).

4.12 Do you have a habitat management and monitoring plan?

☐ No

4.13 Have you used the statutory biodiversity metric tool?
☒ Yes
☐ No
