Main contractor to advise of fire safety procedures (for evacuation, safety point, fire extinguisher location) within the site induction.<br>2. In the event of a fire, report to the responsible person / main contractor on site.<br>3. Only if suitably trained, use correct fire extinguishers for the type of fire.<br>4. In the event of a fire, evacuate to the place of safety & await further instructions from Main Contractor. | 5                                                                                                                                         | 1                              | 5  | Principal Contractor / All Piling Operatives | Cohesion Site Foreman     |  |   |   |   |   |   |   |   |   |   |   |   |   |   |   |    |   |   |   |    |    |   |   |    |    |    |   |    |    |    |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |  |  |  |                |  |              |  |   |               |   |                                       |   |          |   |                                                                    |   |        |   |                                                                         |   |             |   |                             |   |         |   |                                             |                                                  |  |  |  |
