DESCRIPTION -

Tamarit foldable 60×60 cm square table set with 2 steel garden chairs

Evoking the magic of a Parisian bistro in the intimacy of our own home is possible with the 60×60 cm square folding table set and 2 Tamarit steel garden chairs. It is a tribute to the art of sharing life outdoors, where every mid-afternoon coffee, every leisurely chat, and every toast is tinged with elegance and simplicity. The chairs feature a clean and functional aesthetic, thanks to their entirely steel construction with a matte powder-coated finish that makes them durable and easy to fold. The table, made of the same material and with a square shape and sober spirit, completes the set with the serenity of essential forms. Its smooth, unadorned surface invites everything from a simple morning coffee to a light meal in good company. The folding X-frame provides stability and ease of use, true to the urban legacy of European terraces where functionality and beauty coexist in harmony. Likewise, both the table and chairs have polypropylene feet on their bases to protect your floors and ensure proper stability. More than just a garden set, it is a stage for shared memories, where the breeze, the light, and good company intertwine in every moment lived.

As this is outdoor furniture, we recommend protecting it from weather conditions and storing it indoors during the winter months. For proper maintenance, we advise cleaning with a damp cloth, avoiding the use of chemical products.

In some cases, the imagery, measurements and colours, as well as their names, are merely for reference. Everything perceived on the screen can be altered by many factors, which are: the screen calibration, the ambience lights, the viewing angle, etc. If the customer wants to know these details he should consult our technical service, as returns for technical reasons will be at his expense.
