The pre-development biodiversity value was calculated as part of the Preliminary Ecological Appraisal and Biodiversity Net Gain assessment prepared by Lanpro Services Ltd for Land to the North of 4 & 6 Mansfield Avenue, Blackley, Manchester.

The report confirms that:

the desk study and biodiversity assessment were undertaken in January 2026;
the Extended UK Habitat Survey informing the baseline habitat condition was completed on 15 December 2025; and
historic aerial imagery identified that the site had been cleared in 2022, therefore the baseline habitat value was assessed in accordance with the Statutory Biodiversity Metric guidance on habitat degradation using the habitat present prior to clearance.

The report provides a baseline biodiversity value of:

0.49 Habitat Units (application boundary scenario); or
1.04 Habitat Units (full ownership boundary scenario).
