Re: Seventh and Eighth Floors, Sunlight House, Quay Street, Manchester, M3 3LF

Listed Building Consent 145027/LO/2026

Linked applications: variation of condition(s) 2 and 5, and discharge of condition(s) 3 and (in part) 4

Dear Sir or Madam,

We write on behalf of the applicant, Government Property Agency, in relation to the listed building consent referenced above, granted on 19 March 2026 for internal alterations to the seventh and eighth floors of Sunlight House. We enclose two applications, which are being submitted concurrently and which we would ask the Council to consider together for the reasons set out below.

The first application seeks the variation of condition 2 and condition 5 of the consent under section 19 of the Planning (Listed Buildings and Conservation Areas) Act 1990. It has become necessary to revise the approved eighth floor drawings, together with the associated eighth floor finishes drawings, since the original consent was issued. The application seeks to update the plans and documents referred to in condition 2, and the finishes documents referred to in condition 5, to reflect these drawings at revision L03 in place of the previously approved revisions. A schedule of the drawings affected, together with the revised drawings themselves, accompanies the application.

The second application seeks the discharge of condition 3 in full, and the partial discharge of condition 4. In respect of condition 3, we enclose the full and final partition details required by the condition, comprising fixing details for partitions into historic fabric, shadow gap details, specification of glazing frames, and details of glazing manifestation and opacity. In respect of condition 4, this application relates only to the investigatory works required to uncover the parquet flooring on the seventh and eighth floors, and we enclose a methodology statement covering the removal of the raised access floor and the initial exposure of the flooring beneath. The balance of condition 4, concerning the restoration and protection of the parquet flooring itself, will be the subject of a further submission once the condition of the flooring has been established following completion of the investigatory works. We would be grateful if the Council could confirm that this staged approach to discharging condition 4 is acceptable.

We are submitting the two applications together because condition 3 is expressed to operate notwithstanding the details set out in condition 2, and the partition details submitted in support of the discharge application are drawn against the revised eighth floor layouts that are the subject of the variation application. To avoid the partition details being assessed against drawings that are shortly to be superseded, we would respectfully ask that the variation application is determined ahead of, or at the latest alongside, the discharge application, and that both are handled by the same case officer where possible.

The following documents accompany this letter in support of the two applications:

Application 1, variation of condition(s) 2 and 5: completed application form, schedule of drawings affected, and the revised drawings at revision L03.

Application 2, discharge of condition 3 and partial discharge of condition 4: completed application form, partition details, and methodology statement for the investigatory works to the parquet flooring.

Should you require any further information, or wish to discuss either application, please do not hesitate to contact me directly using the details below. We would be grateful for confirmation that both applications have been validated and linked on the Council's system in due course.

Yours faithfully,

Scott Millington RIBA ARB ADPPA MArch BA(Hons)

Evoke Architecture Limited

Seventh and Eighth Floors, Sunlight House, Quay Street, Manchester, M3 3LF
Listed Building Consent 145027/LO/2026 - Schedule of Drawings

The amendments listed in Table 1 arise from a single design change: the introduction of a fire-protected lobby and an additional door to the main Level 08 corridor. In a fire, the additional door prevents smoke passing along the corridor and compromising both fire exits, which would otherwise occur. All revisions to the approved drawings shown below are either a direct consequence of this change or administrative (updated originator codes and revisions following the change of architect and MEP consultant). No other design changes are proposed to the approved scheme.

Table 1 - Proposed amendments: approved plans and documents to be replaced by this submission

Approved plan / document (decision notice)	Replacement (this submission)	Drawing title	Notes

Approved references and revisions are transcribed as printed on decision notice 145027/LO/2026 dated 19 March 2026. Where the decision notice prints the letter 'O' in place of a leading zero (e.g. O1112), this is understood to be typographical. All replacement drawings with an EVK originator code are issued at revision L03.
