

ELEVATION 1_EXISTING ATMs
1:50 @ A1, 1:100 @ A3

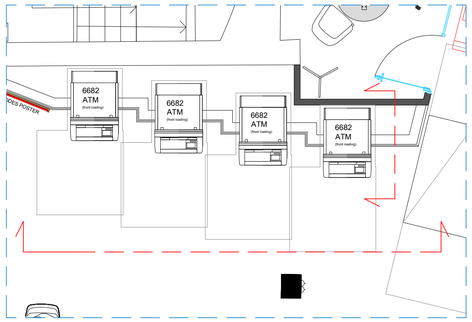

ELEVATION 2_PROPOSED ATMs
1:50 @ A1, 1:100 @ A3

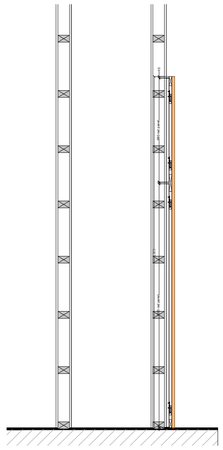

The proposal consists of the replacement of four existing internal ATM units with new model units on a like-for-like basis. The replacement ATMs will be installed in the same locations as the existing machines and will be accommodated within the existing ATM shroud and surrounding enclosure.
No changes are proposed to the building fabric.
The works are limited to the removal of the existing ATM units and installation of upgraded replacement machines within the existing footprint and infrastructure. As such, the proposals constitute a like-for-like replacement with no material change to the external appearance of the premises and no impact on the building fabric.

EXISTING LAYOUT
1:50 @ A1, 1:100 @ A3

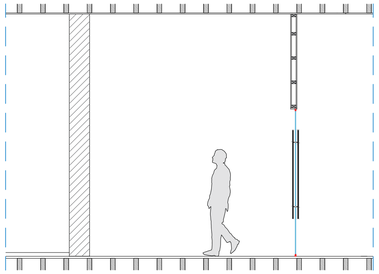

PROPOSED LAYOUT
1:50 @ A1, 1:100 @ A3

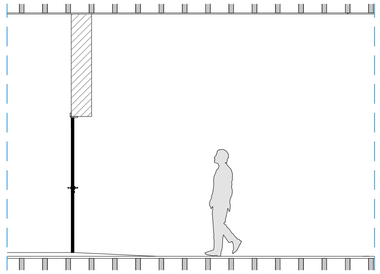

CROSS SECTION
1:50 @ A1, 1:100 @ A3

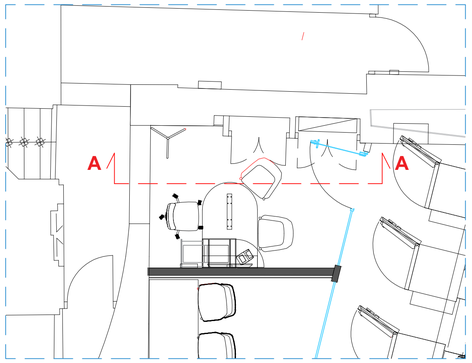

Existing ATM shroud to be retained as existing. ATM units to be replaced with new Santander models in the same locations, with no impact on the building fabric.

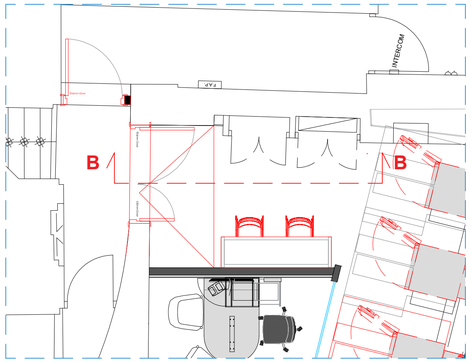

SECTION AA
1:50 @ A1, 1:100 @ A3

SECTION BB
1:50 @ A1, 1:100 @ A3

EXISTING LAYOUT
1:50 @ A1, 1:100 @ A3

PROPOSED LAYOUT
1:50 @ A1, 1:100 @ A3

The proposed works involve the removal of an existing room to create a direct and accessible route to the existing lift, enabling wheelchair users and other mobility-impaired visitors to access the upper floors. This will provide a significant improvement to the accessibility of the branch.
As the existing room and lift lobby are at different floor levels, a new ramp will be formed to provide a compliant step-free connection.
The works are limited to internal alterations and do not involve any modification to the lift itself. No historic fabric will be affected, with the proposals carefully designed to avoid any alteration to the building's original or significant historic features.
