Dear Sir / Madam,

**RE: Invalid letter for application PLA-2026-000568 - visuals - photomontages**

Please see re-attached the photomontages in case you have not received all of these.

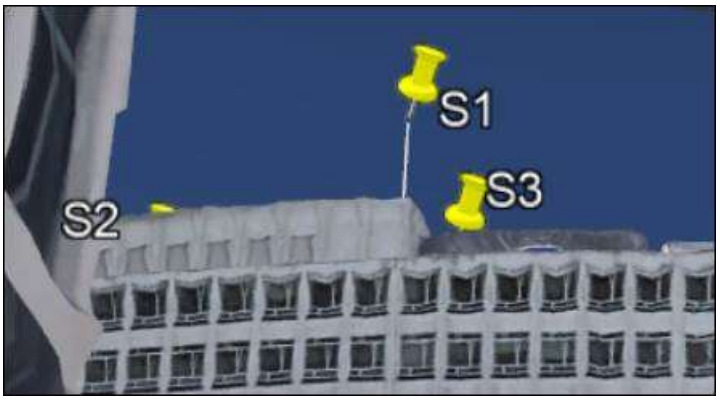

Please see the comments below from our photomontage consultant that echo my initial comments. Please revert back if you need any further clarification on this element.

The statement below is incorrect if it is referring to the photomontages – all 3 sectors have been included and the height of each antenna and dish has been verified:

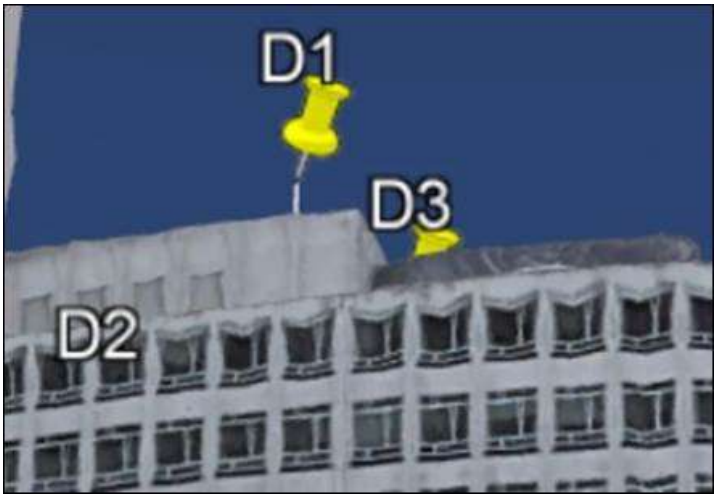

*4 - The views assessment provided only depicts one telecoms mast/antenna and does not include the other masts/antennas, telecom dishes and associated cabinets. This is required to be amended.*

Examples backing this up include the following:

Viewpoint shows Sector 1 – the other sectors are not visible as per the height verification data for the antennas below:

Dish height verification for viewpoint 1:

Another example would be viewpoint 8 where only Sector 3 is visible as per the antenna height verification image below:

Viewpoint 8 dish height verification:

The same verification process has been carried out for all eleven viewpoints and the LPA may be able to get a better understanding of this once all four elevations are available and need to take into account perspective when assessing the number of antennas visible in any one image.

Dear Sir / Madam,

**RE: Invalid letter for application PLA-2026-000568**

Please note that we are pulling together all the information you have requested and we will get this to you ASAP. In terms of the visuals, we have sent you these photomontages illustrate what you will be able see from these vantage points. The cabinets will not be visible from ground level and thus the photomontages are an accurate depiction.

I will come back to you with the other information as soon as our team have pulled this together. Please keep hold of the application.

Many thanks,

Damian Hosker (Contractor)
