Your local planning authority will be able to advise on the content of any assessments that may be required.

Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 (as amended)) would apply?

◯ Yes
⊘ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in The Environment Act 2021: "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

Reason biodiversity net gain does not apply:
Development subject to the de minimis exemption (development below the threshold)

What best describes the size of your site?:
Over 25 square metres

Please justify the reason why biodiversity net gain does not apply:
The proposal comprises the demolition of an existing detached garage and its replacement with a detached outbuilding within the residential curtilage of 189 Mauldeth Road, Manchester. The development is on previously developed domestic land and does not involve the loss or degradation of priority habitat, woodland, hedgerows or other ecologically significant features. The proposal is considered exempt from the mandatory Biodiversity Gain requirement under the de minimis exemption in Schedule 7A of the Town and Country Planning Act 1990.

Note: Please read the help text for further information why developments may be exempt or not in scope.

Details of the pre-application advice received

Email from Holly Wright:

Dear Sakib,
Thank you for your email.

At this stage, I am unclear what specific point you are seeking further advice on. The details set out in your email would typically form part of a planning application submission and would need to be assessed in full through the formal application process.

As previously advised, the proposal would require planning permission. Given this, I am unable to provide a definitive view on whether the development would be supported based on the information currently available. Any such assessment would need to take place following submission of a planning application and consideration of all relevant material planning considerations, including consultation responses.

If you wish to progress the proposal, I would therefore recommend submission of a formal planning application for full assessment.

Kind Regards,
Holly Wright

It is an important principle of decision-making that the process is open and transparent.

For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.

Do any of the above statements apply?
