Supporting information requirements

Where a development proposal is likely to affect features of biodiversity or geological conservation interest, you will need to submit, with the application, sufficient information and assessments to allow the local planning authority to determine the proposal.

Failure to submit all information required will result in your application being deemed invalid. It will not be considered valid until all information required by the local planning authority has been submitted.

Your local planning authority will be able to advise on the content of any assessments that may be required.

Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 (as amended)) would apply?

◯ Yes
⊘ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in The Environment Act 2021: "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

Reason biodiversity net gain does not apply:
Development subject to the de minimis exemption (development below the threshold)

What best describes the size of your site?:
Under 25 square metres

Please justify the reason why biodiversity net gain does not apply:
Mandatory Biodiversity Net Gain does not apply to this application because the proposal qualifies for the de minimis exemption under Regulation 4 of the Biodiversity Gain Requirements (Exemptions) Regulations 2024. The external development is limited to a small single-storey rear extension measuring approximately 3.48 metres by 4.38 metres, giving a footprint of approximately 15.2 square metres. The extension is located within the existing developed rear service-yard area associated with the commercial premises. The remainder of the proposal comprises internal alterations, the reconfiguration and change of use of existing floorspace, a loft conversion and replacement fascia signage, none of which would result in the loss or degradation of an onsite habitat. The submitted site and floor plans also show no hedgerows, watercourses or other linear habitats affected by the development.

Note: Please read the help text for further information why developments may be exempt or not in scope.
