Eligibility

Permitted development rights are subject to conditions set by legislation to ensure that only appropriate proposals are eligible. The need to apply to the Local Planning Authority to see if prior approval is required is one such condition.

The questions below will help determine if the proposals are eligible for this permitted development right.

Please specify the type of roof on which the solar photovoltaic equipment is to be installed:

- [x] Flat
- [ ] Pitched

Would any part of the solar photovoltaic equipment be higher than 1 metre above the highest part of the roof (excluding any chimney)?

- [ ] Yes
- [x] No

Would any part of the solar photovoltaic equipment come within 1 metre of the external edge of the roof?

- [ ] Yes
- [x] No

Would the total electrical generation capacity of all the equipment installed on the building under permitted development rights (previously and in this proposal) total no more than 50 kilowatts?

- [ ] Yes
- [x] No

Please note: This question was added to confirm proposals exceeded the 50 kilowatt ‘microgeneration’ threshold. A previous question on the total generation capacity exceeding 1 megawatt was removed after this limitation was lifted by government on 21 December 2023.

Would the solar photovoltaic equipment be installed on any part of the roof of a building that is:
• a scheduled monument (or the site contains one)
• a listed building (or within the curtilage of a listed building)

- [ ] Yes
- [x] No

Please note: This question was updated to remove reference to installation on roof slopes fronting highways on Article 2(3) land after this limitation was lifted by government on 21 December 2023.

Description of Proposed Works

Please describe the proposed development:

Installation of photovoltaic panels on a flat roof
