Hi Lucy

I'm afraid it is not possible to retain T19. This was extensively reviewed by the Design Team.

The trees to the frontage were looked at over several iterations to try and maximise retention. Unfortunately, the basement extents and the position of the main entrance door (to give a positive interaction to the streetscape / GJS) meant that T19 couldn't be retained. Both T19's RPA and Canopy extent are large and push south on plan and conflict with the basement.

Great effort was undertaken to retain the other two trees T18 and T17 with the basement cranking to suit the RPA and the canopies proposed to have a 30% reduction to reduce the extent / proximity to the façade. This is not possible for T19.

Many thanks

Rachel

Hi Rachel

Please see the response below from the City Council's Arboriculturalist. Please would you look into the retention of T19 as suggested.

Thanks

Lucy

Good morning Lucy,

Plot D Great Jackson Street Manchester M15 4NP - 137227/FO/2023

I have read the proposals for the site and my comments are as follows:

The proposed development will require the removal of 1 x Cat-A tree and 6 x Cat-B groups and 2 x Cat-B individual trees.

Having walked the site to get a better understanding of the impact this will have on the surrounding area, it was apparent that the removals would be necessary. The majority of the Cat-B groups listed for removal are screened from the Mancunian Way due to the presence of 8 semi mature Lime trees and as such this will lesson the overall negative impact the tree losses will have on the area.

The developer has deemed it necessary to remove T19 (Cat-A specimen fronting the Great Jackson Street), however, we would request that this tree was incorporated into the design. Unless I have overlooked some important information, It appears to me that T19 could be successfully retained with some landscaping alterations.

We are happy with the mitigation planting proposals and species selections.

Kind regards
