- G Existing Red Brickwork
- H Existing Red Sandstone Dressings
- I Existing Timber Sash window
- J EAS antennas
- K Proposed glazed telescopic doors

DOOR MANIFESTATION DETAIL E: 1/25

MANIFESTATION OF GLAZING

To comply with the requirements of Approved Document K, glazing manifestations shall be provided to the entrance glazing.

Two black vinyl Mango logos shall be applied to the glazed entrance doors at a height between 1400 mm and 1600 mm above finished floor level (FFL), framed by a continuous horizontal band above and below. These horizontal bands shall extend across the adjacent fixed glazed panels to provide a continuous manifestation across the full entrance.

A second continuous black vinyl horizontal band shall be installed at approximately 900 mm above FFL, extending across all glazed door and adjacent fixed glazing panels.

Refer to drawing detail.

NOTES – AUTOMATIC SLIDING DOOR SPECIFICATION

- Frameless glazed, electrically operated sliding entrance doors incorporating visual manifestation.
- Fire Alarm Interface: The door operator shall be interfaced with the building fire alarm system to automatically open the doors and hold them in the open position upon activation of the fire alarm. A normally open (N/O) volt-free contact, provided by others, shall be terminated at the operator controller.
- Power Failure Operation: In the event of a mains power failure, the doors shall automatically open using the integral battery back-up and remain in the open position until the mains supply is restored.
