Hi James,

Thanks for the call a moment ago!

So in summary, instead of staff having to pay & claim on parking expenses or use company cards, we offer an account that fully removes employees needing to claim back on parking or for the company to process expenses. The account also streamlines parking expenses/receipts into one ready made monthly VAT invoice, provides full visibility on parking history and spend, has the ability to allocate costs to job references automatically, reduces companies chances of receiving fines and more.

The main benefits of our corporate account:

- All parking expenses are streamlined into one monthly VAT invoice, so there's no more manual parking admin
- Entirely remove the stress and need for employees pay for parking and have to claim it back, as well as remove the need for admin teams to process any card claims and VAT (all automated)
- Full visibility on any current parking and parking history, including spend and usage (you can pull reports on this)
- Restrict which vehicles drivers can use for company parking
- Unlimited vehicles can be assigned
- Employees can be assigned a Cost Centre or a Reference number for reporting
- Can pull reports on parking outside of certain days/times
- No more waiting a pay and display machines and wasting time running between jobs as everything is on the app, including extending time
- A job reference number can be added for employees if you ever wanted to allocate costs to certain jobs
- A system to help remove the occurrence of PCN's
- Can add/remove employees or vehicles within a click
