Notes On Connection Options

- Virgin Media Gig2 Hybrid Fibre is available using the coax/fibre DOCSIS 3.1 network.
- Fibre (FTTC) is possibly available and speeds will likely be above 30 Mbps, see the latest offers.
- three 4G service is available to the majority of premises in the postcode. three store.
- three 5G service with indoor coverage to most premises in the postcode is available. three store.
- three 5G service with outdoor coverage of most premises in the postcode. three store.
- The package search on our main site will filter product availability based on the data shown on this page when you search there with your postcode.
- The BT Wholesale ADSL2+ service is available but your distance from the exchange means speeds will probably be under 2 Mbps.
- Sky LLU ADSL2+ is available but your distance from the exchange means it may be slow.
- TalkTalk LLU ADSL2+ retail and wholesale services are available but your distance from the exchange means they may be slow.
- All premises in this postcode are believed to be served by the same Openreach cabinet, but check your specific address with a retailer before ordering.

Speed Test

Average in M9 6AE in the last 12 months

Download:	111.9 Mbps
Upload:	9.9 Mbps

These download and upload speeds are crowd sourced from public speed tests and may be higher or lower than the connection speed that is possible in the postcode.

Your Broadband Speed Test Result

We have tested your speed and have recorded an average download speed of:

89.24 Mbps

We have performed a number of tests looking at your download speed, upload speed and latency. You can see the results of these in the graph below.

thinkbroadband® speed test results

Avg HTTP x6 download	Avg HTTP x1 download	Avg TBB upload
89.2 Mbps	79.7 Mbps	42 Mbps
Burst HTTP x6	Burst HTTP x1	Burst upload
92.3 Mbps	87 Mbps	58.9 Mbps

ISP	Latency	Date
Not Detected	23ms	26/08/2026

speedtest03.thinkbroadband.com		12:57 BST

Speedtest Explanation

The download tests use a standard web protocol (HTTP) to help highlight variations in connection performance.

The **burst speed** figure shows the speed your computer and connection sustained for a short period during the test.

The **HTTP x6** test carries out six downloads at the same time to help maximise the usage on the connection.

For those who want to run a test that is more sensitive to provider congestion try this special test version.

Your average upload speed was recorded as: 42.00 Mbps.

Part Fibre (FTTC) – IMPORTANT NOTE ON SPEEDS – This postcode should be able to to receive a 'fibre-optic' service. Some fibre services are 'full fibre' (FTTP) whilst others are 'part fibre' (FTTC) which means speeds can vary based on how long your line is. We think you're likely to get part-fibre services **over 40 Mbps** downstream. The packages below may include listings with faster average speeds, however **you may not get the full speeds shown on the package**. Check with your provider before ordering a part-fibre (FTTC) product which advertises speed of up to 80Mbps. Read more about broadband technologies.

For more details about what broadband technologies and speeds are available, please visit our Local Broadband Availability page. Many broadband services do not include a voice service, if you want a voice over broadband service (Digital Voice/VoIP) this can often be added as an extra. The concept of line rental is ending due to the PSTN switch-off.

The default sort for this page is by speed. You can change this by using the arrows at the top of the columns or sort by **first year cost**.

Provider	Package	Download speed (average)	Monthly (inc. VAT)	First year cost (inc. VAT)	Contract period	Compare up to 5 packages
